EXECUTIVE SUMMARY

Pennoni Associates Inc. (Pennoni) has been retained by the Delaware River Joint Toll Bridge Commission (Commission) to determine if the projected year 2013 revenues will be sufficient to satisfy the conditions of the Commission's Current Bond Indenture, which requires under Section 501(a) the following:

Section 501(a) of the Commission's Bond Indenture states "The Commission covenants that at all times it will establish and maintain a schedule of tolls for vehicular traffic over the system, and will collect tolls, so that the Net Revenues in each fiscal year will at all times be at least sufficient to provide funds in an amount not less than (1) the greater of: (i) one hundred thirty percent (130%) of the Annual Debt Service for such fiscal year on account of all Applicable Long-Term Indebtedness then outstanding under the provisions of this Indenture, or (ii) one hundred percent (100%) of the Maximum Annual Debt Service on all Applicable Long-Term Indebtedness, plus (A) the amount of required transfers from the Revenue Fund to the credit of the Reserve Maintenance Fund pursuant to the Annual Capital Budget, and (B) an amount sufficient to restore any deficiency in the Debt Service Reserve Fund within an eighteen (18) month period; plus (2) the amount of any Short-Term Indebtedness outstanding pursuant to Section 703(a)(2); plus (3) the amount of Net Revenues in excess of the sum of the amounts set forth in clauses (1) and (2), together with Other Revenues pledged to the payment of Subordinated Indebtedness, shall be sufficient to pay the Annual Debt Service for any Subordinated Indebtedness."

Anticipated revenues for 2013 were calculated by applying the current toll structure to the projected 2013 volumes for each vehicle type on the seven (7) toll bridges under the jurisdiction of the Commission.

Table 22 lists the projected revenues and expenditures for the year 2013. The sum of year 2013 projected toll bridge revenues is \$118,940,555.77, the Net Revenue is \$70,080,491.77, and the Annual Debt Service is \$32,036,296.00. Comparing the Net Revenue to the Annual Debt Service, the Net Revenue is 219% of the Annual Debt Service (Debt Service Coverage Ratio of 2.19), which satisfies the requirements of the Commission's Bond Indenture Section 501(a)(1).

INTRODUCTION

Pennoni Associates Inc. (Pennoni) has been retained by the Delaware River Joint Toll Bridge Commission (Commission) to project traffic volumes by vehicle type on the seven (7) toll bridges for the year 2013. The seven (7) toll bridges and 13 toll supported bridges under the jurisdiction of the Commission are listed below from south to north.

TOLL BRIDGES	TOLL SUPPORTED BRIDGES
DISTRICT ONE	
Trenton–Morrisville (U.S. Route 1)	Lower Trenton
New Hope–Lambertville (U.S. Route 202)	Calhoun Street
	Scudder Falls (Interstate 95)
	Washington Crossing
	New Hope–Lambertville (Route 179)
	Centre Bridge–Stockton
	Lumberville–Raven Rock (Pedestrian Only)
DISTRICT TWO	
Interstate 78	Uhlerstown–Frenchtown
Easton–Phillipsburg (U.S. Route 22)	Upper Black Eddy–Milford
	Riegelsville
	Northampton Street
	Riverton–Belvidere
DISTRICT THREE	
Portland–Columbia	Portland–Columbia (Pedestrian Only)
Delaware Water Gap (Interstate 80)	
Milford–Montague	

The purpose of the study is to determine if the year 2013 projected toll revenues will be sufficient to satisfy the conditions of the Commission’s current Bond Indenture, which requires under Section 501(a) the following:

Section 501(a) of the Commission’s Bond Indenture states “The Commission covenants that at all times it will establish and maintain a schedule of tolls for vehicular traffic over the system, and will collect tolls, so that the Net Revenues in each fiscal year will at all times be at least sufficient to provide funds in an amount not less than (1) the greater of: (i) one hundred thirty percent (130%) of the Annual Debt Service for such fiscal year on account of all Applicable Long-Term Indebtedness then outstanding under the provisions of this Indenture, or (ii) one hundred percent (100%) of the Maximum Annual Debt Service on all Applicable Long-Term Indebtedness, plus (A) the amount of required transfers from the Revenue Fund to the credit of the Reserve Maintenance Fund pursuant to the Annual Capital Budget, and (B) an amount sufficient to restore any deficiency in the Debt Service Reserve fund within an eighteen (18) month period; plus (2) the amount of any Short-Term Indebtedness outstanding pursuant to Section 703(a)(2); plus (3) the amount of Net Revenues in excess of the sum of the amounts set forth in clauses (1) and (2), together with Other Revenues pledged to the payment of

Subordinated Indebtedness, shall be sufficient to pay the Annual Debt Service for any subordinated indebtedness.”

The year 2013 projected Net Revenue is 219% of the Annual Debt Service (Debt Service Coverage Ratio of 2.19), which satisfies the requirements of the Commission’s Bond Indenture Section 501(a)(1).

METHODOLOGY

To project traffic volumes on the toll bridges for the year 2013, the following were considered: new development projects that could add traffic to the toll bridges, roadway construction projects that could divert motorists from their regular routes, and general background growth based on historic traffic volume data crossing the bridges.

YEAR 2013 DEVELOPMENT PROJECTS

County planning/engineering offices for the eight (8) counties along the Delaware River within the study area (Bucks, Northampton, Monroe, and Pike counties in Pennsylvania and Mercer, Hunterdon, Warren, and Sussex counties in New Jersey) were contacted to learn of large developments which could have a major effect on toll bridge volumes during the year 2013. While several development projects are underway, only a few major projects are expected to open/expand/contract during the 2013 calendar year. For informational purposes, we have discussed major projects which may reach full build-out in the distant future but will likely not contribute any traffic during the year 2013.

District 1 (Trenton-Morrisville, New Hope-Lambertville)

In Bucks County, there are no new major developments proposed for 2013 in the area of the New Hope-Lambertville bridge.

In Mercer County, Pennrose Properties will start construction on a 204-unit low-income housing development in the spring of 2013 but is not expected to impact traffic volumes in 2013.

The Opus Group will expand its Mercer Corporate Center development by 100,000 square feet, which may have a slight impact on the Trenton-Morrisville bridge but is not expected to significantly increase traffic.

The expansion of the Quakerbridge Mall is proceeding on a slower schedule and is not expected to impact traffic volumes in 2013.

In southern Hunterdon, New Jersey, there are no new major developments proposed for 2013 in the area of the New Hope-Lambertville Toll Bridge.

District 2 (I-78, Easton-Phillipsburg)

An 8,500 seat multi-purpose arena at the intersection of 7th and Hamilton Streets in Allentown, Pennsylvania is expected to be completed by September 2014. The arena will house the Lehigh

Valley Phantoms ice hockey team. The development is not expected to impact river crossing volumes until construction is completed; thus, no additional traffic crossing the toll bridges was considered.

The Sands Casino, which opened a 300 room hotel in May 2011, has been granted an expansion of their games area by 20%. This expansion is not expected to impact traffic volumes in 2013.

Sycamore Landing is a proposed residential development consisting of 247 units to be located on Route 22 near the Phillipsburg Mall in Phillipsburg, Warren County, New Jersey. No construction has begun as of early 2013, and construction is not expected to be completed in 2013. As such, no additional traffic crossing the toll bridges was considered.

No major developments are proposed in northern Hunterdon County for 2013.

District 3 (Delaware Water Gap, Milford-Montague, Portland-Columbia)

In Pike County, the Highland Village residential development (approximately 5,300 units) is currently on hold. No impact to traffic volumes was considered.

No major developments are proposed in Monroe County, Pennsylvania or Sussex County, New Jersey for 2013.

RECENT ROADWAY CONSTRUCTION PROJECTS

Pennoni coordinated with the Commission, County planning/engineering offices, and the Departments of Transportation to identify significant roadway construction projects near the bridges. In addition, the Pennsylvania Department of Transportation (PennDOT) Transportation Improvement Program (TIP) and New Jersey TIP were also reviewed. Our findings are as follows:

2012 Roadway Construction Projects

- ☑ The Riverton-Belvidere Toll Supported Bridge Water Street Improvement Project was initiated in September 2012 and was completed by October 31st, 2012. The project involved single lane restrictions and alternate side closures on Water Street. Based on the distance to alternative crossings and the volume to capacity ratio on the bridge, traffic diversions were minimal and as such, no adjustments were made.
- ☑ The Interstate 78 PA Approach Paving Improvement Project began in September 2012 and will be completed in the spring of 2013. There are no detours required but lane closures were implemented starting in September 2012 and extending through the winter of 2013. Single lane closures will be implemented as necessary with an additional travel lane being closed during overnight periods. Based on the volume to capacity ratio on the bridge, traffic diversions will be minimal and as such, no adjustments were made.
- ☑ The Broad Street Viaduct leading to the Easton-Phillipsburg Toll Bridge was repaired from August 29th through September of 2012. The project did not involve lane closures. Limited duration traffic slow-downs were conducted along Route 22 westbound for a one-hour period. Traffic diversions were minimal and as such, no adjustments were made.

- ☑ Lighting fixtures were repaired on the Delaware Water Gap (Interstate 80) Toll Bridge on September 24 through September 26, 2012. The left lanes were closed in both directions during the mid-day hours. Traffic diversions were minimal and as such, no adjustments were made.
- ☑ The New Hope-Lambertville Toll Supported Bridge was closed during the overnight hours of December 12th and 13th, 2012 to allow installation of a new overhead weight-limit sign on the bridge's New Hope side. Traffic diversions were minimal and as such, no adjustments were made.
- ☑ The bridge replacement of S.R. 2030 (Foxtown Hill Road) over S.R. 2028 (Broad Street) will continue through 2013. In December 2010, the replacement of S.R. 2030 (Foxtown Hill Road) over S.R. 2028 (Broad Street) commenced in Smithfield Township, approximately one half mile from the Delaware Water Gap (I-80) Toll Bridge. S.R. 2030 (Foxtown Hill Road) serves as the ramp for I-80 Exit 310. During construction, traffic is expected to access the Delaware Water Gap (I-80) Toll Bridge from Exit 309 with a limited amount of traffic diverting to the Portland-Columbia Toll Bridge. Construction started in December 2010 and is anticipated to be completed in October 2013. There are currently lane restrictions on Foxtown Hill Road but no closures/detours. As such, no adjustments were made.
- ☑ The rehabilitation of the S.R. 0611 (E. Riverside Drive) Bridge over Bushkill Creek in Easton, PA is located near the intersection of S.R. 0611 and Route 22. The Easton-Phillipsburg Toll Bridge carries Route 22 over the Delaware River. Vehicles detoured during construction could utilize local roadways to access Route 22 and the Easton-Phillipsburg Toll Bridge. As such, no adjustments are made.
- ☑ The rehabilitation of the S.R. 0006 (Grand Army of the Republic Highway) Bridge over Sawkill Creek is located approximately two miles west of the Milford-Montague Toll Bridge. Traffic accessing the Milford-Montague Toll Bridge was not diverted or detoured. As such, no adjustments were made.
- ☑ S.R. 2001 is undergoing a full reconstruction between the unincorporated communities of Bushkill, in southern Pike County and Dingmans Ferry, near the privately owned and tolled Dingmans Ferry Bridge. The roughly 13.6 mile reconstruction will take place through 2020. No traffic is expected to be diverted from the Delaware Water Gap or the Milford-Montague Toll Bridges.
- ☑ The Pennsylvania Turnpike is constructing a new interchange on I-95 in Bristol. The project is in the preliminary phases of construction, with Phase 1 construction anticipated to be completed in 2014. Phase 1 of construction is not thought to have impacted any traffic patterns in 2012.
- ☑ The Delaware Road Bridge over the Delaware Canal will be replaced. During construction, a temporary structure will carry vehicles over the Delaware Canal. As such, no adjustments were made.
- ☑ The South Broad Street Bridge over Assunpink Creek in Trenton, New Jersey will be updated to a modern structure from its current stone arch structure. Detours for this construction may divert eastbound traffic from the Lower Trenton Toll Supported Bridge to the Trenton - Morrisville Toll Bridge. Construction started in 2012. Due to the availability of adjacent routes, no adjustments were made.

2012 Travel Alerts

- ☑ Lighter than normal traffic volumes were observed on all bridges from October 29th through November 4th due to Hurricane Sandy. *It is estimated that the bridges lost a total of 192,682 vehicles during this period.*
- ☑ The Trenton-Morrisville Toll Bridge was shut down in the Route 1 southbound direction from 11:15 am to 1:00 pm on February 16, 2012 due to an accident. *It is estimated that 2,150 vehicles were diverted during this closure.*
- ☑ Several road closures were implemented in Trenton on Saturday November 10, 2012 for a half-marathon. All access roads for the Lower Trenton Toll Supported Bridge were closed from 7:45 am until 9:30 am. All access roads for the Calhoun Street Bridge were closed from 7:45 am until 10:45 am. *It is estimated that 4,100 passenger cars were diverted to the Trenton-Morrisville toll bridge during this closure.*
- ☑ The Lumberville-Raven Rock Toll Supported bridge was closed on October 29th due to the shutdown of the Bulls Island State Park on the New Jersey side during Hurricane Sandy. The bridge is a pedestrian bridge and therefore no adjustments were made.

2013 Roadway Construction Projects

- ☑ The Easton-Phillipsburg Toll Bridge Rehabilitation Project is anticipated to start in June of 2013 and extend 21 months to February 2015. Traffic impacts are expected due to planned lane closures. Vehicular traffic will be limited to one-lane in each direction during various construction phases. Local detours will be necessary during some periods in the City of Easton, where some entry and exits for Route 22 will undergo work as part of this project. It is anticipated that traffic-related impacts will be limited to 15 months of the 21 month duration. *During 2013, a total of 634,688 vehicles are expected to be diverted from the Easton-Phillipsburg bridge; 423,319 will be diverted to the I-78 bridge, and the remainder will use the Northampton Street bridge.*
- ☑ The New Hope-Lambertville Toll Bridge PA & NJ Approach Roadways Repaving and NJ Route 29 Overpass Bearing Seat and Bridge Paving Project is anticipated to start in June of 2013 and will continue to November 2013. There will be a two (2) week detour of the Route 202 Southbound traffic onto the adjacent Lower York Road. This should not have a significant impact on traffic volumes in 2013.
- ☑ The Interstate 78 PA Approach Paving Improvement Project began in September 2012 and will be completed in the Spring of 2013. There are no detours required but lane closures were implemented starting in September 2012 and extending through the Spring of 2013. Single lane closures will be implemented as necessary with an additional travel lane being closed during overnight periods. This project is not expected to impact any traffic patterns in 2013.
- ☑ The section of I-84 between S.R. 0006 and the New York state border is being rehabilitated and repaved. This project is unlikely to divert vehicles to the Delaware Water Gap (I-80) Toll Bridge or the Milford-Montague Toll Bridge. This project is not expected to impact any traffic patterns in 2013.
- ☑ The Pennsylvania Turnpike work on a new interchange on I-95 in Bristol, as mentioned earlier, is in the preliminary phases of construction, with Phase 1 construction anticipated to be completed in 2014. Phase 1 of construction is not expected to impact any traffic patterns in 2013.
- ☑ S.R. 2001 is undergoing a full reconstruction between the unincorporated communities of Bushkill, in southern Pike County and Dingmans Ferry, near the privately owned and tolled

Dingmans Ferry Bridge. The roughly 13.6 mile reconstruction will take place through 2020. No traffic is expected to be diverted from the Delaware Water Gap or the Milford-Montague Toll Bridges.

- ☑ The Bushkill Creek bridge rehabilitation project is located approximately four miles northwest of the Easton Phillipsburg bridge and six miles northwest of the I-78 bridge. Construction is expected to begin in 2013. The previous bridge has been out of commission since 2011; thus, construction is not expected to impact any traffic patterns in 2013.
- ☑ Freemansburg Avenue over Route 33 in Northampton County, Bethlehem Township, is being reconstructed. The project site is approximately 5 miles from the Easton-Phillipsburg and I-78 bridges. Estimated project start date has yet to be determined. Thus, the project is not expected to impact traffic patterns in 2013.
- ☑ The rehabilitation of the S.R. 0006 (Grand Army of the Republic Highway) Bridge over Sawkill Creek is located approximately two miles west of the Milford-Montague Toll Bridge. Traffic accessing the Milford-Montague Toll Bridge is not expected to be diverted or detoured.
- ☑ Route 31 is undergoing pavement resurfacing from South of Rt. 78 to North of CR 634. The project, approximately 11 miles from the Easton-Phillipsburg and I-78 bridges, is not expected to impact traffic patterns in 2013.
- ☑ The nine mile-long Route 202 Parkway is under construction between Route 63 in Montgomery Township and Route 611 in Doylestown Township. This construction zone is approximately 11 miles west of the New Hope-Lambertville bridge and is not expected to impact bridge traffic patterns in 2013.

HISTORICAL TRAFFIC VOLUMES

The Commission provided historical traffic volume information for the 11 vehicular toll supported bridges and the seven (7) toll bridges. For the purpose of this study, volumes and toll revenue data from the years 2007 to 2012 were used.

Traffic volume data for the toll supported bridges is summarized on a monthly basis from 2007 to 2012, as listed in Tables 1 through 6. Where volume data was not available, traffic volumes were estimated and are shown in italics. No vehicle classification data was provided, but most toll supported bridges (with the exception on the Scudder Falls Bridge and the Upper Black Eddy-Milford Bridge) have weight restrictions prohibiting large trucks.

The Scudder Falls Toll Supported Bridge carries approximately 21 million vehicles per year, which converts to an average annual daily traffic volume (AADT) of approximately 57,000 vehicles. Volumes on the Scudder Falls Bridge have remained constant for several years. The Lower Trenton, Calhoun Street, New Hope-Lambertville and Northampton Street Toll Supported Bridges generally carry approximately 4 - 8 million vehicles per year. The remaining toll supported bridges generally carry from 1.2 to 2.6 million vehicles per year.

At the toll supported bridges, there were minor fluctuations in volumes year to year on most bridges, with the five (5) year trend generally less than a four (4) percent increase or decrease per year.

Reviewing information from the seven (7) toll bridges under the jurisdiction of the Commission during 2012, we found that the Delaware Water Gap (Interstate 80) and Interstate 78 Toll Bridges carry the largest traffic volumes (9.1 and 11.0 million toll paying westbound vehicles per year, respectively). Easton-Phillipsburg and Trenton-Morrisville (US Route 1) carry 5.3 and 7.9 million toll paying (westbound) vehicles per year, respectively. The remaining three (3) toll bridges carry between 1.2 million and 1.9 million toll paying (westbound) vehicles per year. These figures have remained fairly consistent over the past few years, with yearly variances in growth and decline in traffic averaging between 5% and 8%. Unadjusted traffic volume data for the toll bridges is summarized from 2007 to 2012 by vehicular class, and is listed in Tables 7 through 12.

The passenger vehicles represented approximately 87 percent of the vehicles on the seven (7) toll bridges during 2012. The five (5) axle tractor-trailer continues to be the most common truck type, representing approximately 8.8 percent of vehicles crossing the seven (7) toll bridges during 2012. Two (2) axle trucks represent the next largest portion of trucks at 2.2 percent. The auto / tractor trailer volume percentages have remained consistent for the past several years.

YEAR 2013 TRAFFIC VOLUME AND TOLL REVENUE PROJECTIONS

In developing traffic projections, adjustments were applied to raw traffic data to account for significant decreases or increases in traffic volumes attributable to events such as drastic weather patterns or construction detours. A total of four adjustments were applied to 2012 traffic volumes. In late October and early November of 2012, Hurricane Sandy caused a significant drop in toll traffic. Daily traffic volumes declined greater than forty percent (40%) during the last week of October and greater than twenty percent (20%) during the first week in November. It is estimated that the bridges lost a total of 192,682 vehicles during this period. The year 2012 was a leap year. An estimated total 96,129 vehicles were observed in the westbound direction on February 29, 2012 on all toll bridges. The volumes were adjusted to reflect February data without this additional day. February volumes for the Trenton-Morrisville Toll Bridge were adjusted by 2,150 vehicles to reflect a brief shutdown in the Route 1 southbound direction on February 16, 2012 due to an accident. The November volumes for the Trenton-Morrisville Toll Bridge were also adjusted to reflect a diversion of 4,100 passenger cars from the Lower Trenton Toll Supported Bridge and the Calhoun Street Bridge during road closures implemented for a half-marathon.

Tables 13 through 19 summarize five (5) year traffic volumes for the seven (7) toll bridges for the years 2007 through 2012. The five (5) year trends are illustrated graphically in Figures 13A/B to 19A/B. Any adjustments due to construction projects or significant weather effects are accounted for in 2010, 2011 and 2012 traffic volumes in order to accurately illustrate growth trends. Review of the data indicates a 0.4% decrease in traffic volumes system wide from 2011 to 2012. Passenger cars decreased by 0.7%, accounting for several adjustments to 2012 volumes. All trucks increased by 1.6% system wide.

Upon review of the traffic data from 2007 to 2012, the volumes on all District Three bridges and the Easton-Phillipsburg Toll Bridge reached a low point in 2012. The Trenton-Morrisville, New Hope-Lambertville, and Interstate 78 bridges reached a low point in 2008. The volumes on the Trenton-Morrisville and Interstate 78 Toll Bridges have been growing steadily since 2008. The volumes on the New Hope-Lambertville toll bridge have been declining since 2009.

Based on the findings listed above, a growth or reduction factor was applied to adjusted 2012 traffic volumes for each vehicle type on each toll bridge to project the year 2013 volumes. The growth factors that were used to project 2012 traffic volumes to 2013 traffic volumes for each vehicle type at each bridge are shown in Tables 13 through 19. Vehicles with significantly small sample sizes were projected to remain flat. Passenger car volumes are projected to increase by 0.17% system wide from 2012 to 2013 and overall truck volumes are projected to increase by 1.33%. These growth factors reflect adjusted 2012 traffic volumes.

During 2013, one construction project is expected to divert motorists from their usual route. The Easton-Phillipsburg Toll Bridge Replacement Project is expected to reduce Westbound bridge volumes by 634,688 vehicles with 423,319 diverted to the I-78 Bridge and the remainder using the Northampton Street Bridge. The 2013 volume projections reflect an adjustment for this project.

The following toll structures were applied to the projected 2013 volumes to determine the projected year 2013 revenue for each toll bridge:

<u>Vehicle Type</u>	<u>Toll Structure</u>	
	Cash/Casual E-ZPass	Discount E-ZPass
Passenger Vehicles	\$ 1.00	\$ 0.60
2-Axle Trucks	\$ 6.50	\$ 5.85
3-Axle Trucks	\$ 12.00	\$ 10.80
4-Axle Trucks	\$ 16.00	\$ 14.40
5-Axle Trucks	\$ 20.00	\$ 18.00
6-Axle Trucks	\$ 24.00	\$ 21.60
7-Axle Trucks	\$ 28.00	\$ 25.20

Frequent or commuter E-ZPass passenger car users that have 20 or more crossings in a 35-calendar day period receive a 40% discount over the cash / casual E-ZPass fare. For trucks, the off peak traffic (9 PM – 6 AM) receives a 10% discount over the cash fare. We calculated a weighted average toll rate for each vehicle class specific to each bridge using total toll revenue and total volumes. Tables 13 through 19 show the weighted average toll rates utilized for each vehicle type on each bridge.

Table 20 compares the unadjusted 2012 volumes and revenues for each bridge and maintenance district with the projected 2013 volumes and revenues. As indicated, overall toll traffic volumes are projected remain flat increasing by just 4,703 vehicles (0.01%). Revenues are projected to increase by approximately \$1,391,134.32 (1.22%). The growth in overall toll traffic volumes does not reflect adjustments made to year 2012 traffic volumes and is intended to show the anticipated measured increase from 2012 to 2013.

Table 21 is provided in response to Section 501(a)(1) of the Commission's Bond Indenture and provides Total Revenue, Operating Expenses, Net Revenue and Annual Debt Service for 2012. The requirement that the Net Revenue for the preceding fiscal year be at least 130% of the Annual Debt Service (Debt Service Coverage Ratio of 1.30) was met.

Table 22 lists the projected revenues and expenditures for the year 2013. The sum of year 2013 projected toll bridge revenues is \$118,940,555.77, the Net Revenue is \$70,080,491.77, and the Annual Debt Service is \$32,036,296.00. Comparing the Net Revenue to the Annual Debt

Service, the Net Revenue is 219% of the Annual Debt Service (Debt Service Coverage Ratio of 2.19), which satisfies the requirements of the Commission's Bond Indenture Section 501(a)(1).

Table 23 provides a comparison for revenues, expenditures, and Debt Service Coverage Ratios for the 2012 projected volumes (from the 2011 Traffic Engineering Report), the actual 2012 unadjusted volumes, and the 2013 projected volumes.

Table 1 - 2007 Toll Supported Bridge Volumes

NOTES:

Note Estimated figures due to adjustments shown in *italics*. Data interpolated from 2009 and available 2010 volumes.

- ¹ Calhoun Street TSB closed from 5-24-10 to 9-24-10 for rehabilitation under Contract No. TS-442A. Counters not in service.
- ² Washington Crossing TSB closed from 8-9-10 to 9-24-10 for rehabilitation under Contract No. TS-447B. Counters not in service.
- ³ Riegelsville TSB closed 8:00 PM Fri 9-17-10 to 7:00 AM Mon 9-20-10 under Contract No. TS-445A. Counters not in service.
- ⁴ Northampton Street TSB counter down 12-22-10 to 12-31-10. Data interpolated.
- ⁵ Washington Crossing TSB counter down 12-1-10 to 12-22-10. 2009 data interpolated and decreased by 1%.

1	New Hope-Lambertville	1,856,699	\$ 2,975,670.46
2	Interstate 78	11,847,807	\$ 57,505,888.58
2	Easton-Phillipsburg	4,544,303	\$ 6,840,284.10
3	Portland-Columbia	1,297,109	\$ 2,298,561.63
3	Delaware Water Gap	8,962,023	\$ 30,093,390.75
3	Milford-Montague	<u>1,199,512</u>	<u>\$ 1,461,017.58</u>
Total		37,836,668	\$ 115,332,555.77
Net Toll Revenue		(From above)	\$ 115,332,555.77
Toll Violation Enforcement Revenue ¹			\$ 1,760,000.00
E-ZPass Service Fee Estimate		(2013 Budgeted)	\$ 875,000.00
Interest Income		(2013 Budgeted)	\$ 571,000.00
Other Income		(2013 Budgeted)	<u>\$ 402,000.00</u>
1. Total Projected Revenue - 2013			\$ 118,940,555.77
2. Operating Expenses - 2013		(2013 Budgeted)	<u>\$ 48,860,064.00</u>
3. Net Revenue		(Line 1 - Line 2)	\$ 70,080,491.77
4. Annual Debt Service		(2013 Budgeted)	\$ 32,036,296.00
5. 130% of Annual Debt Service			\$ 41,647,184.80
6. Calculated Debt Service Coverage Ratio		(Line 3 / Line 4)	2.19
<p>Therefore, the requirement that the Debt Service Coverage Ratio be not less than 1.30 of the Annual Debt Service has been met, satisfying the requirements of the current Commission's Bond Indenture, Section 501(a)(1).</p>			
<p>* Estimated 2013 volumes and revenues reflect 423,319 diversions from the Easton-Phillipsburg toll bridge to the I-78 toll bridge and 211,369 car diversions from the Easton-Phillipsburg to the local bridge.</p>			
<p>¹This represents income that is used as a partial offset for the maintenance of the violation enforcement system, the operation of the violation process center, and violations.</p>			

Table 23: Projected vs. Actual Revenue and Expenditures

District	Bridge	2012 Projected Volume	2012 Actual Volume	2013 Projected Volume
