ROLL CALL

WELCOMING REMARKS OF CHAIRMAN

Chairman DeGerolamo welcomed those persons whose identities are set forth hereinabove under "Appearances".

INTRODUCE ANY COMMENTS FROM THE PUBLIC

Chairman DeGerolamo addressed the meeting and invited any comments from the public on items pertaining to today's Agenda.

EXECUTIVE DIRECTOR'S REPORT

Executive Director Resta addressed the meeting and said:

"Good morning everyone. We have a wide variety of items for consideration and action today, including: the advancement of a critically important regional transportation project that is expected to begin major construction in 2017. The approval of traffic and revenue projections for 2015 and the acceptance of the General Engineering Consultant's 2014's annual inspection report

"The preeminent agenda item today is a resolution authorizing the Final Design Services Contract for the Scudder Falls Bridge Replacement Project. This action will culminate a selection process that was set in motion last summer when the Commission issued an RFP for Final Design Services after reaffirming that it would pursue a conventional design-bid-build procurement approach for the project. The RFP process included a September pre-proposal meeting that attracted 132 consultants representing 74 engineering consulting firms, including

Meeting of February 23, 2015

38 Identified Business Enterprises. We later received 10 proposals by the October 30 deadline. A technical evaluation committee reviewed the proposals, after which four short-listed firms were invited for presentations/interviews. The TEC's summary findings were concurred by a Senior Selection Committee and negotiations over scope and fee were conducted this past month with the top-rated firm. The result of this process is a recommended final design contract award to Michael Baker, Jr., Inc. of Hamilton, N.J. for a not-to-exceed amount of \$22,490,000. As I noted last month, we have been preparing to move this project into final design since the Federal Highway Administration's issuance of a Finding of No Significant Impact two and a half years ago. Today's action effectively gives this project a jump start. As a result, we expect to be moving on all cylinders in the coming months to schedule and complete all other projectpreparation tasks. In 2015 alone, we are looking to establish a Project Labor Agreement, an Owner-Controlled Insurance Program, a detailed project schedule, an updating of the project website, and perhaps bond activity toward the end of the year. The hard work is just beginning – and the project schedule is just beginning. From this point on, it's incumbent upon staff and Commissioners alike to keep this project moving on a steady forward path and to resist indecision or complacency that could undermine further progress and cause delay, which from this point on, costs money.

"Moving to other agenda items, we are asking Commissioners to accept the 2014 Traffic Engineering Report compiled by Pennoni Associates. This report contains the final 2014 toll traffic volumes. It also projects the traffic volumes and toll revenues we should expect for our seven toll bridges in 2015. Like last year, this report provides good reason for optimism. The report reconfirms that both traffic and revenue increased at our toll bridges last year – a significant accomplishment considering the foul winter weather impacts during the first three months of 2014. Truck volumes continued on an upward trend last year. Five-axle trucks - our most significant revenue generator - were especially strong last year with an increase of nearly 50,000 more tolled crossings. Four-axle trucks were close behind with over 30,000 more recorded transactions. Looking ahead to this year, the report projects that our toll-direction traffic volumes will rise 1.41 percent and revenue will rise 2.12 percent. As a result, the Commission's financial outlook continues to be very positive. Our projected debt-service coverage ratio is calculated at 2.41 – a figure well above the bond indenture's 1.3 minimum ratio and the Commission's 1.5 target.

"Today's agenda also includes a resolution for Commissioners to accept the 2014 Annual Inspections Report compiled by our General Engineering Consultant, Transystems. As is the case in even years, this report focuses on our 13 non-toll bridges. The report also identifies capital projects and their estimated costs for 2015 and 2016. The report shows that all of our facilities are in an "operating condition" while highlighting this notable accomplishment for the Commission.

Meeting of February 23, 2015

With the replacement of the Route 611 and the rehabilitation of the Broad Street Viaduct approach bridges during the recent Easton-Phillipsburg Toll Bridge project, the Commission no longer has any bridges classified as Structurally Deficient. This achievement underscores the ongoing benefits of the comprehensive capital program the Commission initiated in 2001. It also is a testament to the hard work that our engineering, financial and administrative teams put into planning, funding and executing the scores of individual capital projects the Commission executed at its various facilities over the past 13 years or so. The report is expected to mark the eighth and final inspection report the Commission will receive under a contract from Transystems, which has served as our General Engineering Consultant since 2007. The reason is that the Commission is poised today to approve a new General Engineering Consultant contract with a different firm – Cherry, Weber & Associates, PC. This Commission certainly appreciates the fine work that Transystems has provided since 2007 - the firm and its predecessor, Lichtenstein Associates, certainly played an important role in the success of the Commission's capital program. But after eight years, the time has come to give the bridge inspection process a fresh set of eyes.

"In closing my remarks, I want to mention that it is our intention to promptly post both the 2014 Traffic Engineering Report and the 2014 Annual Inspection Report on our website upon acceptance by Commissioners. They also will be included in the 2014 Annual Report that will be issued later this year.

"Mr. Chairman, that concludes my report for February."

STATISTICAL SUMMARY OF EXPENDITURES

There follows reports entitled "Budget vs Actual" covering the month of January 2015, the first month of operations of fiscal year 2015 relative to Toll Bridges, Toll Supported Bridges and Administration departments.

Total expense plus encumbrance totaled \$4,107,037 for the month. This expense represents 81.0% of the 2015 Year-to-date operating budget. This large positive variance is mainly due to the lack of encumbrances approved during the month of January. As the annual encumbrances are added for fuels and road materials over the next several months, this large surplus is anticipated to be reduced.

There were no unusual expenses during the month of January 2015.

CONTRACT COMPLIANCE REPORT

STATUS UPDATES: During the month of January 2015, the Contract Compliance Department (CCD) updated the guidelines for the Construction Services and Professional Services and forward them to the engineering department to verify for any fatal flaws. Once this process is completed, the guidelines will be posted in the Commission website under Doing Business with the Commission. The Contract Compliance Department also created checklists for Construction and Professional services for the project managers and the CCD which identify the requirements needed for pre-award and post award on every project.

In an effort to provide an update of where the Contract Compliance Program stands from its inception, in addition to the monthly reports, the CCD is preparing a power point presentation to the Commissioners during one of their first quarter committee meetings.

The contract with QWIC, Inc. through the capital project was signed by the Commission and fully executed. The first invoice from QWIC, Inc. was submitted for payment with revisions.

The purchase order requisition to acquire B2GNOW that will provide software access, setup, integration and maintenance has been submitted by the purchasing department. This program will facilitate the tracking of an array of necessary information for the Contract Compliance program.

MEETINGS:

- The CCD attended Oral Interviews and Presentations by the short-listed firms for Scudder Falls Bridge Replacements Project Design Services for contract C-660A.
- The CCD attended and participated in the Oral Interviews for C-684A General Engineering Consultant 2015 2016 Annual Inspection.

COMMUNICATIONS REPORT January 2015

COMMISSION AWARENESS EFFORTS:

Update of Scudder Falls Replacement Project Website – With the project shifting into the final design phase, initiated an eventual overhaul of the project website – scudderfallsbridge.com. Since its creation in 2003, the website's focus has been geared toward the Environmental Assessment documentation, review and approval process. That objective was realized with the 2012 issuance of a FONSI for the project, so it is time to reorient the site toward basic public information about project purpose, need and progress. It's anticipated that the updating process will take several months to complete, requiring coordination with engineering, the project team (AECOM), and ACT Engineering.

Annual Report – Continued distribution of the 2013 annual report by handing out copies to members of the Pike County Road Task Force, the Safe 80 Task Force, and HART commuter services in Hunterdon County. Community Affairs, meanwhile, mailed copies to the newly appointed legislative leadership in Pennsylvania. A similar mailing is being made to New Jersey.

• MEDIA RELATIONS:

Hot Topics: I-78 tractor-trailer fire with driver death in Williams Township (off Commission property); couple seeks love lock bridge designation for New Hope-Lambertville Bridge; various letters to editor on proposed I-80 widening through Stroudsburg, PA.; police respond to unauthorized New Year's revelry event at Lumberville-Raven Rock Bridge; sinkhole opens near Northampton Street Bridge; stolen car arrest near Calhoun Street Bridge; construction contract approved for Lower Trenton Bridge approaches project in 2015; Bridge Commission assists Lambertville in preventing dumping of plowed snow into the river; missing man's body found in river south of Portland-Columbia bridge; car carrier fire on NJ side of I-78 Toll Bridge.

• COMMUNITY AFFAIRS: (Please refer to Community Affairs report)

2015 Public Operating Budget — Worked with Rich McClellan, Steve Cathcart, and website consultant Liquid INT to construct and upload public operating budget for 2015.

CAPITAL IMPROVEMENT PROGRAM

Lower Trenton Toll-Supported Bridge Approaches Project – Issued a press release announcing the Commission's award of a construction contract to repave and improve the approach roadways, sidewalks and intersections in the vicinity of the Lower Trenton Toll-Supported Bridge. The release outlined potential travel impacts and generated articles in the Trenton area newspapers.

WEBSITE

E-ZPass Map – Removed customer warning about summer phishing scam involving E-ZPass violations and replaced it with a post and link about the newly E-ZPass service map.

Updating for 2105 – Facilitated updating of various sections for uploading of dated content items for 2015. Swapped out former Governor Tom Corbett and replaced it with new PA. Governor Tom Wolf. Added meeting postponement and rescheduled date for the Commission's January meeting. Removed 2014 operating budget and replaced it with the 2015 version.
