Executive Summary

The Delaware River Joint Toll Bridge Commission (Commission) owns and operates a total of twenty (20) bridges over the Delaware River within roughly 140 miles extending from the Philadelphia-Bucks County line north to the New Jersey/New York state border. Pennoni Associates Inc. (Pennoni) has been retained by the Commission to develop traffic volume and revenue forecasts for eight (8) toll bridges under its jurisdiction. The traffic and revenue forecasts are provided to assist the Commission in determining if the projected 2021 revenues will be enough to satisfy the conditions of the Current Bond Indenture, which requires under Section 501 (a) the following:

Section 501(a) of the Commission's Bond Indenture states "The Commission covenants that at all times it will establish and maintain a schedule of tolls for vehicular traffic over the system, and will collect tolls, so that the Net Revenues in each fiscal year will at all times be at least sufficient to provide funds in an amount not less than (1) the greater of: (i) one hundred thirty percent (130%) of the Annual Debt Service for such fiscal year on account of all Applicable Long-Term Indebtedness then outstanding under the provisions of this Indenture, or (ii) one hundred percent (100%) of the Maximum Annual Debt Service on all Applicable Long-Term Indebtedness, plus (A) the amount of required transfers from the Revenue Fund to the credit of the Reserve Maintenance Fund pursuant to the Annual Capital Budget, and (B) an amount sufficient to restore any deficiency in the Debt Service Reserve Fund within an eighteen (18) month period; plus (2) the amount of any Short-Term Indebtedness outstanding pursuant to Section 703(a)(2); plus (3) the amount of Net Revenues in excess of the sum of the amounts set forth in clauses (1) and (2), together with Other Revenues pledged to the payment of Subordinated Indebtedness, shall be sufficient to pay the Annual Debt Service for any Subordinated Indebtedness."

In December 2020, the Commission adopted a Financial Resiliency Policy which establishes a "Target Debt Coverage Ratio" of 2.0 and calls for an assessment of the need for a toll adjustment if the Debt Coverage Ratio is projected to fall below 1.75.

As a result of the Covid-19 pandemic, 2020 was a year unlike any in recent history and there is ongoing uncertainty regarding the impact of Covid-19 toll volumes and revenues in 2021 and beyond. In 2020 the Covid-19 pandemic resulted in temporary and permanent business closures and alternate remote work structure and accessibility by businesses where possible, all of which contributed to an 24% reduction in toll volumes and a 9.4% reduction in toll revenue across the eight (8) toll bridges in 2020. The actual calculated Annual Debt Service Coverage Ratio in 2020 was 1.64 versus an expectation of 1.85.

Because of the unique circumstances in 2020 and the uncertainty regarding 2021, traffic and revenue projections were developed for multiple scenarios, which represent various timelines and levels of recovery from the effects of the Covid-19 pandemic, that produce a range of potential Annual Debt Service Coverage Ratios that could be expected in 2021.

The anticipated 2021 base volumes, by month for each vehicle class, were forecast at each bridge based on an evaluation of the monthly toll volumes from January 2013 through February 2019. Covid-19 adjustment factors reflecting the impact of partial shutdowns were developed based on a comparison of forecast 2020 volumes to the actual 2020 toll volumes at each of the bridges. The Covid-19 adjustments were then applied to each of the forecast 2021 base volumes, based on potential Covid-19 recovery timelines and varied levels of recovery from the effects of the pandemic.

For the purposes of this report, population immunity is defined as the point at which 70-80% of NJ & PA residents are vaccinated, and it is anticipated that most state & local restrictions will be lifted.

The following are the 9 scenarios that were evaluated to develop the range of toll volumes, revenues and Annual Debt Service Coverage Ratio that could occur in 2021:

Scenarios 1-3 – Utilizes a short-term timeline in which a population immunity is reached in 6 months. Includes continued partial shutdowns until vaccine distribution to the general population in March 2021, reaching population immunity and returning to “new normal” in August 2021, with recovery of lost toll trips due to Covid-19 being 100%, 90% and 80%, respectively.

Scenarios 4-6 – Utilizes a medium-term timeline in which population immunity is reached in 11 months. Partial shutdowns continue until vaccine distribution to the general population in May 2021, reaching population immunity and returning to “new normal” normal in December 2021, with recovery of lost toll trips due to Covid-19 being 100%, 90% and 80%, respectively.

Scenarios 7-9 – Utilizes a long-term timeline in which population immunity is reached in 14 months. Partial shutdowns continue until vaccine distribution to the general population in June 2021, reaching population immunity and returning to a “new normal” in March 2022, with recovery of lost toll trips due to Covid-19 being 100%, 90% and 80%, respectively.

The projected gross toll revenues for the eight (8) toll bridges are calculated using the forecast 2021 traffic volumes for each of the scenarios and the 2020 “average” toll rates for each of the bridges, which account for E-ZPass discounts for frequent passenger car travel and off-peak truck crossings.

The range of forecast toll volumes and revenue at each of the 8 (eight) toll bridges are summarized in **Table ES-1**.

Table ES-1: 2021 Approximate Range of Toll Volume and Revenue Forecasts

Bridge	2021 Toll Volume Forecast Range (Million)	2021 Revenue Forecast Range (Million)
Trenton-Morrisville	8.39 to 9.44	\$18.89 to \$19.76
Scudder Falls (I-295)	5.95 to 7.45	\$13.77 to \$16.11
New Hope-Lambertville	1.48 to 1.73	\$2.79 to \$3.06
Interstate 78	10.65 to 11.48	\$67.02 to \$67.98
Easton-Phillipsburg	4.78 to 5.14	\$8.59 to \$9.02
Portland-Columbia	1.24 to 1.30	\$2.72 to \$2.84
Delaware Water Gap(I-80)	9.08 to 9.48	\$34.37 to \$34.84
Milford-Montague	1.21 to 1.24	\$1.67 to \$1.70
Total	42.82 to 47.31	\$149.85 to \$155.35

The 2021 projected toll bridge revenues range from \$149,852,217.54 to \$155,346,616.76 with the projected Net Revenue ranging from \$77,126,787.63 to \$82,648,658.86. The Annual Debt Service is \$49,012,876.00. Comparing the projected Net Revenue to the Annual Debt Service, the projected Net

Revenue ranges from 157% to 168% of the Annual Debt Service (Debt Service Coverage Ratios of 1.57 to 1.68). The requirement that the Net Revenue for the preceding fiscal year be greater than 130% of the Annual Debt Service is met in all scenarios. However, the Commission's recent (December 2020) resolution to maintain a minimum Debt Service Coverage Ratio of 2.0 is not met in any of the scenarios and all scenarios trigger the assessment of the need for a toll adjustment.

Introduction

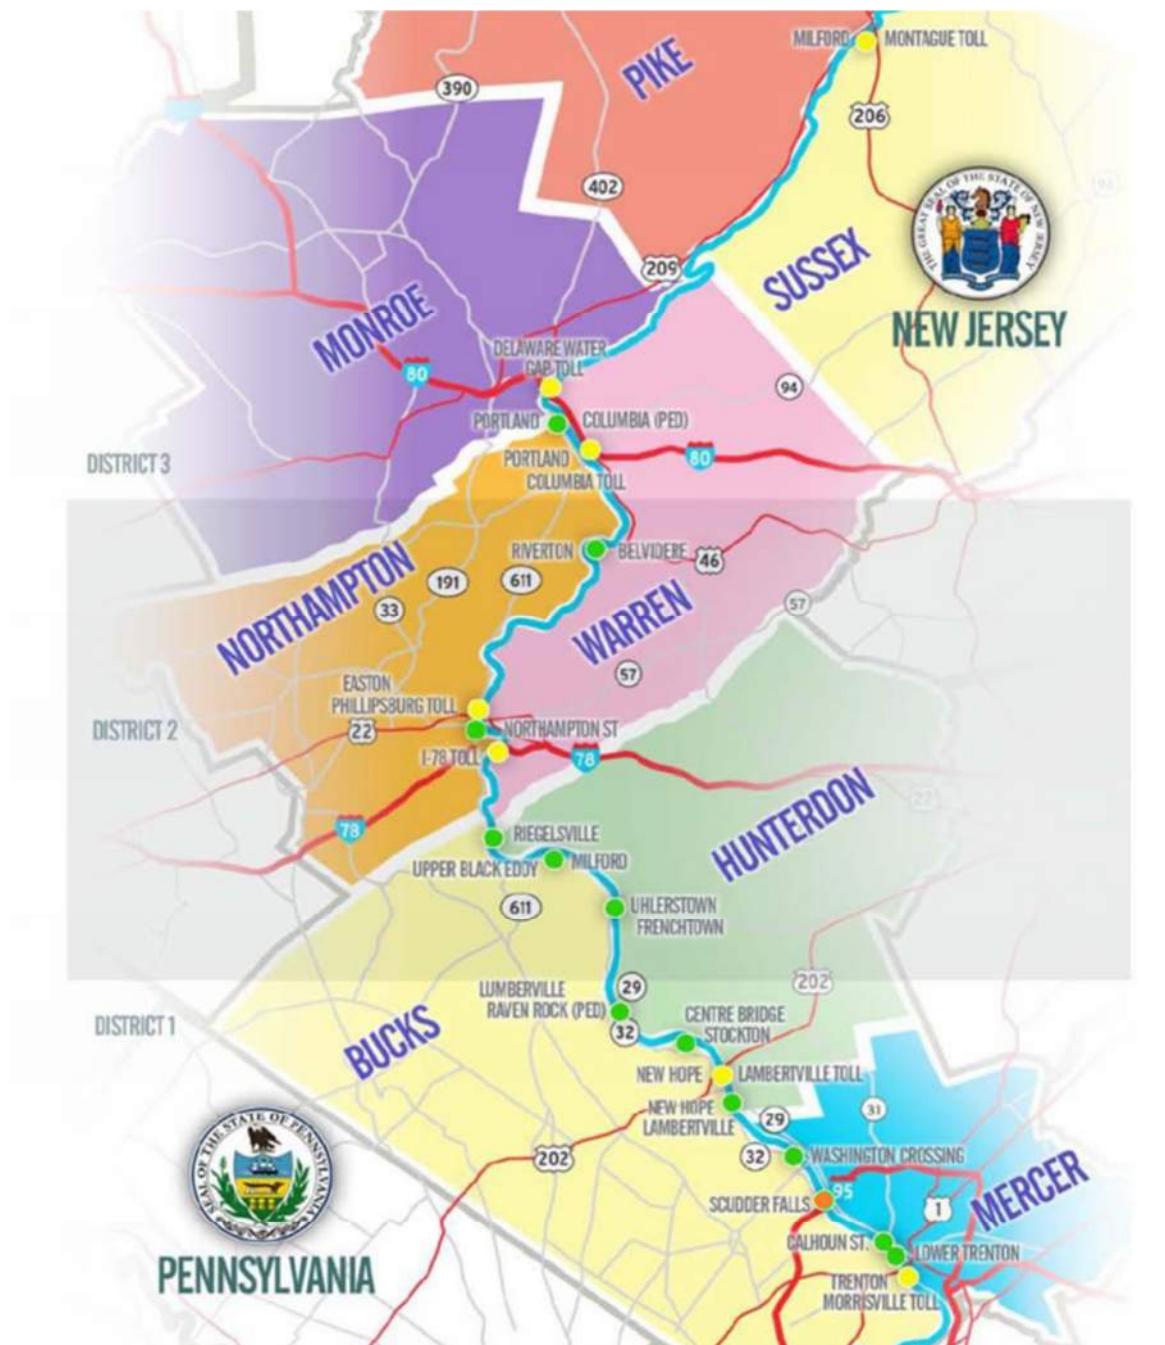

Pennoni has been retained by the Commission to develop traffic volume and revenue forecasts for eight (8) toll bridges under its jurisdiction. The traffic and revenue forecasts are provided to assist the Commission in determining if the projected 2021 revenues will be enough to satisfy the conditions of Section 501 (a) of the Current Bond Indenture.

The Commission owns and operates a total of twenty (20) bridges over the Delaware River within roughly 140 miles extending from the Philadelphia-Bucks County line north to the New Jersey/New York state border. The eight (8) toll bridges, ten (10) toll-supported vehicular bridges and two (2) toll-supported pedestrian bridges under the jurisdiction of the Commission are listed below from south to north.

Table 1: Bridges Owned and Operated by the Delaware River Joint Toll Bridge Commission

TOLL BRIDGES	TOLL-SUPPORTED BRIDGES
Southern Region	
Trenton-Morrisville (U.S. Route 1)	Lower Trenton
Scudder Falls (Interstate 295)	Calhoun Street
New Hope-Lambertville (U.S. Route 202)	Washington Crossing New Hope-Lambertville (Route 179) Centre Bridge-Stockton
	Lumberville—Raven Rock (Pedestrian Only)
Central Region	
Interstate 78	Uhlerstown-Frenchtown
Easton-Phillipsburg (U.S. Route 22)	Upper Black Eddy-Milford Riegelsville Northampton Street Riverton-Belvidere
Northern Region

Figure 1: DRTJBC Bridge Locations

Historical Traffic Volumes

The Commission provided historical traffic volumes for the ten (10) toll-supported bridges carrying vehicular traffic and the eight (8) toll bridges. Toll bridge volumes for the years 2003 to 2020 were used in this study.

Recorded traffic volumes crossing the toll-supported bridges (both directions) are summarized in **Table A-1** within **Appendix A**. **Tables A-2 through A-19** summarize toll-supported bridge volumes (both directions) by year and month. Where volume data was not available, traffic volumes were estimated and are shown in red. All toll-supported bridges with the exception of the Upper Black Eddy-Milford Bridge have weight restrictions prohibiting large trucks.

The Lower Trenton, Calhoun Street, New Hope-Lambertville and Northampton Street Toll-supported Bridges carried between 3.9 and 5.4 million vehicles in 2020. The remaining toll-supported bridges generally carried from 1.0 to 2.2 million vehicles in 2020.

At the toll-supported bridges, traffic volumes there are typically fluctuations in volumes from year to year. In a typical year, the overall volume on toll-supported bridges can vary up or down up to 2% with individual bridges experiencing even larger fluctuations in traffic. In 2020, the combined traffic on the toll supported bridges fell approximately 13.3 million vehicles (31.5%) from 2019 as a result of the Covid-19 Pandemic.

Historical recorded toll traffic volumes for the eight toll bridges (westbound direction) are summarized by vehicular class in **Tables A-20 through A-37** within **Appendix A**.

Between 2003 and 2019, traffic volumes on the seven (7) legacy toll bridges increased from 34,007,789 in 2003 to 44,991,153 in 2019. This represents a combined average growth rate (CAGR) of 1.2% per year over the past over those 16 years. Passenger cars represent approximately 85% of the overall traffic volume and increased from 29,105,960 in 2003 to 35,004,774 in 2019, a CAGR of 1.2% per year. Trucks increased from 4,901,829 in 2003 to 6,003,255 in 2020, an average growth rate of 1.3% per year.

In 2020, as a result of the Covid-19 pandemic, the actual toll bridge traffic volume was approximately 24% less than the projected 2020 toll volume. The passenger cars were approximately 26% less than projected and trucks, although less affected, were approximately 6% less than projected.

The Interstate 78 Toll Bridge continued to carry the largest traffic volume (9.5 million toll paying westbound vehicles). The Trenton-Morrisville (US Route 1) and Delaware Water Gap carried 7.3 and 8.2 million toll-paying (westbound) vehicles, respectively. Scudder Falls carried 5.3 million toll-paying (westbound) vehicles and Easton-Phillipsburg had 4.2 million toll-paying (westbound) vehicles. The remaining three (3) toll bridges carried between 1.1 million and 1.4 million toll-paying (westbound) vehicles.

Five (5) axle tractor-trailers are the most common truck type, representing approximately 11 percent of vehicles crossing toll bridges during 2020. Two (2) axle trucks represent the next largest portion of trucks at 3 percent.

Historical volumes on the toll bridges for the years 2003-2020 is graphically summarized according to total vehicles, passenger vehicles, and trucks on **Figure 2 and Figure 3**.

Year 2021 Toll Bridge Traffic Volume and Revenue Projections
Delaware River Joint Toll Bridge Commission

February 22, 2021

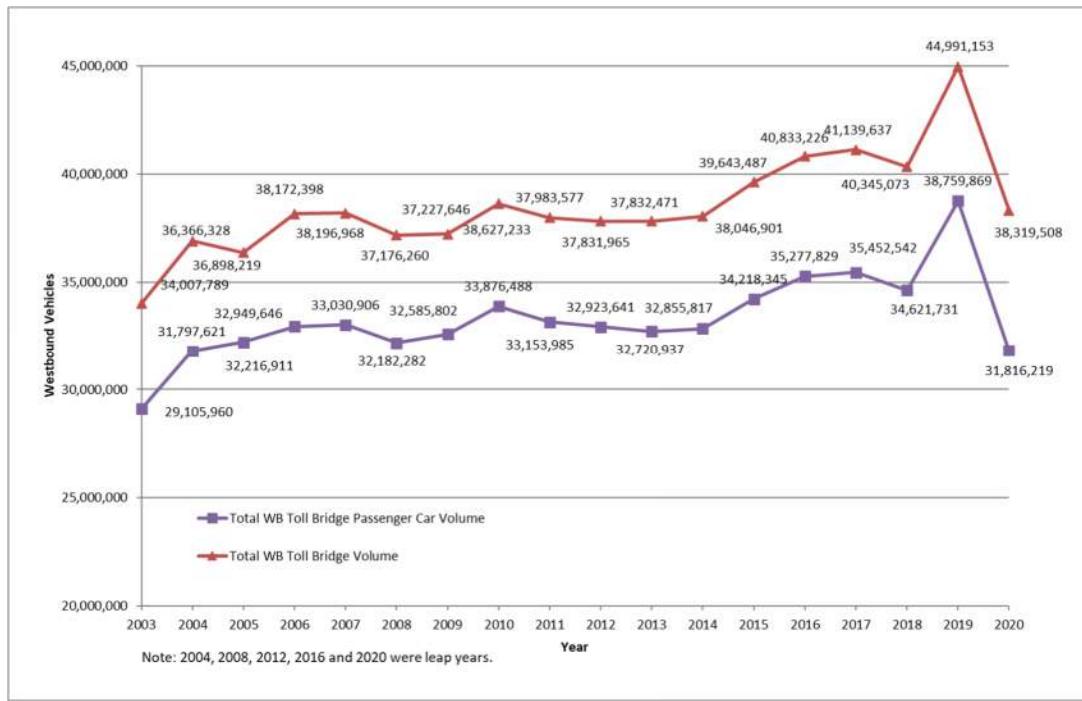

Figure 2: Total DRJTBC Westbound Toll Bridge Volumes (2003-2020)

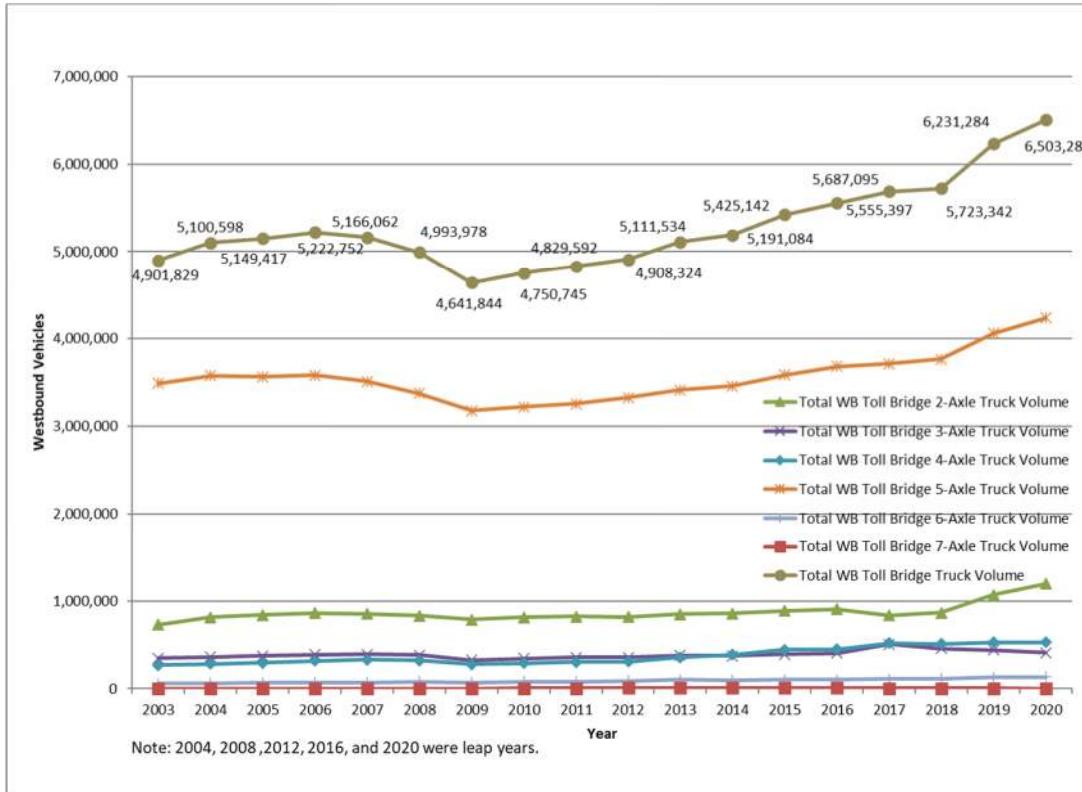

Figure 3: Total DRJTBC Westbound Toll Bridge Truck Volumes (2003-2020)

Effect of Covid-19 on 2020 Traffic Volumes

On March 4, 2020 New Jersey announced its first case of Covid-19 and Pennsylvania followed shortly on March 6th. Over the next 3 weeks both PA and NJ would begin to progressively implement restrictions in an attempt to manage the spread of the virus. On March 19th, Pennsylvania ordered all “non-life sustaining” businesses to close and NJ followed on March 21st with a statewide stay-at-home order. For the remainder of 2020 both Pennsylvania and NJ remained in various states of lockdown.

The Covid-19 pandemic not only resulted in temporary and permanent business closures and an alternate remote work structure and accessibility by businesses where possible, all of which contributed to the overall reduction in of traffic volumes across the eight (8) toll bridges in 2020. Factors, which varied from month to month, included:

- Temporary closure of all non-essential business and schools during initial full lock-down phase (Mid-March to late June)
- Loosening of restrictions during partial shutdown phase (i.e. take-out and outdoor dining at restaurants, loosening of restrictions on public gatherings)
- Permanent closure of some small businesses
- Alternative work arrangements (working virtually)
- Differing regional restrictions (State and County)

A comparison of volumes between the 2020 toll volumes and 2019 toll volumes and projected 2020 toll volumes can be seen in **Table 2**.

Table 2: 2020 Toll Traffic Volume Comparisons

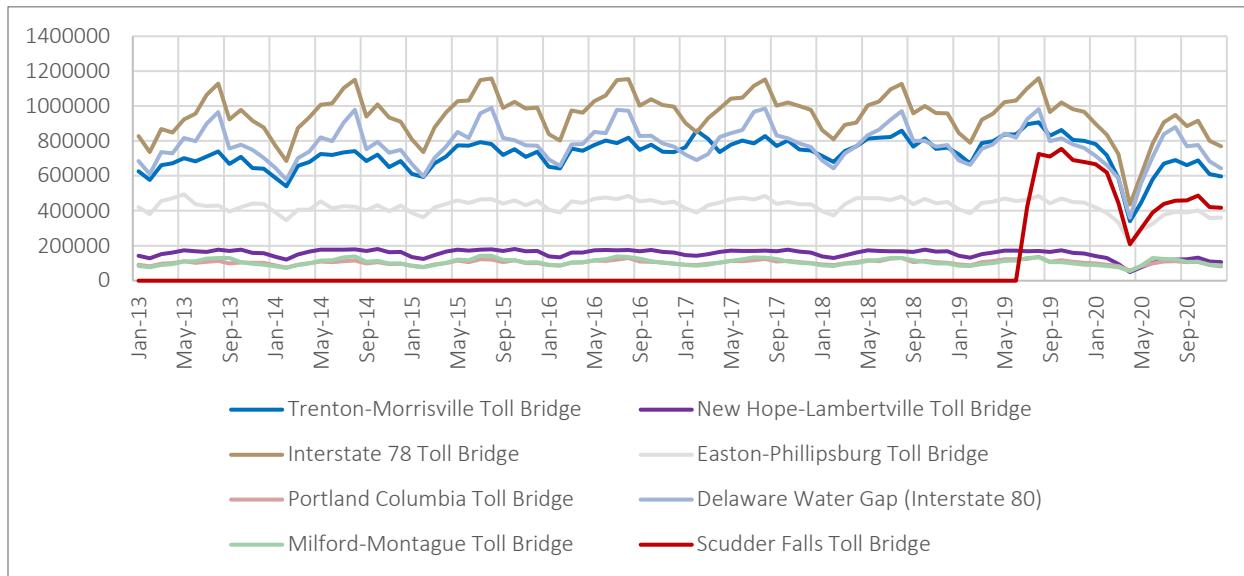

Bridge	2019 Toll Volumes	2020 Toll Volumes	Difference	2020 Projected Toll Volumes	Difference
Trenton-Morrisville	9,751,671	7,395,024	-2,356,647	10,150,442	-2,755,418
Scudder Falls (I-295)	3,983,124*	5,329,000	+1,345,876	8,426,962	-3,097,962
New Hope-Lambertville	1,920,743	1,304,386	-616,357	1,920,137	-615,751
Interstate 78	11,757,270	9,536,700	-2,220,569	11,959,313	-2,422,613
Easton-Phillipsburg	5,376,819	4,265,095	-1,111,724	5,492,702	-1,227,607
Portland-Columbia	1,338,548	1,123,605	-214,943	1,359,009	-235,404
Delaware Water Gap (I-80)	9,606,899	8,203,949	-1,403,738	9,584,137	-1,380,188
Milford-Montague	1,256,079	1,161,749	-94,330	1,247,990	-86,241
TOTAL	44,991,153	38,319,508	-6,672,432	50,140,692	-11,821,184

* Reflects tolled volume from July 14, 2019- December 31, 2019

It is estimated that Covid-19 resulted in an overall decrease of 6,672,432 vehicles from the 2019 toll volumes, which only included 5 1/2 months of Scudder Falls tolling and resulted in 11,821,184 vehicles less than were projected in the *2019 Traffic Engineering Report*.

Figure 4 illustrates the effect of Covid-19 on the westbound toll bridge volumes.

Figure 4: DRJTBC Westbound Toll Bridge Monthly Volumes by Bridge (2013-2020)

Current Toll Rates

The following toll structures have been in effect since June 30, 2011 at the existing toll bridges:

Table 3: Toll Structures per Vehicle Type

Vehicle Type	Toll Structure	
	Cash/E-ZPass	Discount E-ZPass
Passenger Vehicles	\$ 1.00	\$ 0.60
Passenger vehicle w/ Trailer	\$ 2.00	\$ 2.00
2-Axle Trucks	\$ 6.50	\$ 5.85
3-Axle Trucks	\$ 12.00	\$ 10.80
4-Axle Trucks	\$ 16.00	\$ 14.40
5-Axle Trucks	\$ 20.00	\$ 18.00
6-Axle Trucks	\$ 24.00	\$ 21.60
7-Axle Trucks	\$ 28.00	\$ 25.20

In 2020, E-Z Pass passenger car discounts of 40% were issued for 16 or more crossings in a calendar month. For E-ZPass trucks, the off-peak traffic (9 PM – 6 AM) receives a 10% discount over the cash fare.

On July 14, 2019, tolling of the westbound direction of the Scudder Falls Bridge (Interstate 295) began. The following toll rate schedule for the Scudder Falls Bridge was approved by the Commission on September 26, 2016:

Table 4: Toll Structure per Vehicle Type, Scudder Falls Bridge

Vehicle Type	Toll Structure		
	E-ZPass	Discount E-ZPass	Toll-by-Plate
Passenger Vehicles	\$ 1.25	\$ 0.75	\$ 2.60
2-Axle Trucks	\$ 7.00	\$ 6.30	\$ 8.35
3-Axle Trucks	\$ 12.75	\$ 11.48	\$ 14.25
4-Axle Trucks	\$ 17.00	\$ 15.30	\$ 19.00
5-Axle Trucks	\$ 21.25	\$ 19.13	\$ 23.75
6-Axle Trucks	\$ 25.50	\$ 22.95	\$ 28.50
7-Axle Trucks	\$ 29.75	\$ 26.78	\$ 33.25

The Scudder Falls Bridge uses all electronic toll collection (AET) technology, whereby customers either pay tolls through E-Z pass or are identified by camera images of their license plate (Toll-by-Plate) and sent a toll invoice.

Future Toll Traffic Volume Projections

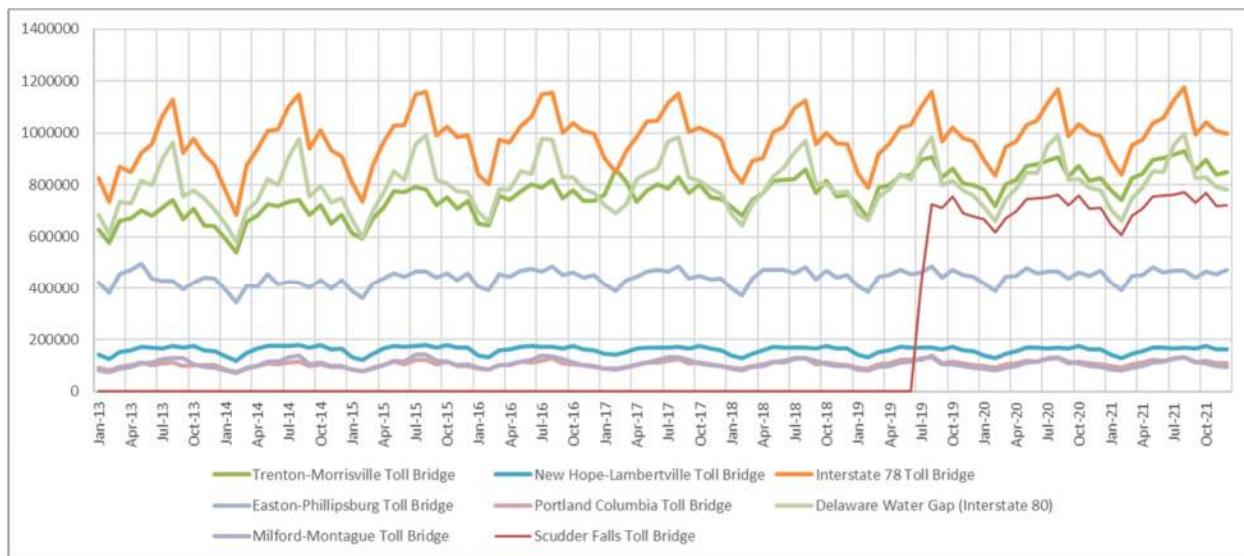

Methodology

Pennoni maintains a database of recorded toll volumes which dates back to 2003. In previous iterations of the Toll Bridge Traffic Volume and Revenue Projection Report, projected traffic volumes would be developed on the previous year-end volumes and the application of an annual background growth rate for each vehicle class at each bridge, and targeted adjustments to account for increases or decreases in toll volumes attributable to construction projects, snow events, and other events which may have diverted motorists from their regular route.

As a result of the Covid-19 pandemic, the methodology used to calibrate the observed 2020 toll volumes and to develop the 2021 projected toll volumes was altered. Using the toll volume data from years prior the Covid-19 pandemic (2013-2019) a base forecast of the expected monthly volumes was developed for March 2020 through 2021 at each toll bridge for each vehicle classification. A comparison of the 2020 Base toll volumes and the projected 2020 toll volumes from the *2019 Traffic Engineering Report* shows an overall difference of less than 0.3%. For the Scudder Falls Bridge, only 7 months of toll volumes was available. Projected base toll volumes for the Scudder Falls Bridge was estimated using weighted ratios of the available Scudder Falls Bridge data to the toll volumes at the adjacent Trenton-Morrisville and New Hope-Lambertville toll bridges.

Figure 5 illustrates the historical toll volumes at each of the 8 toll bridges along with the projected 2020 base and 2021 Bast toll volumes. The 2020 and 2021 base forecast numbers reflects both seasonal variability and annual background growth.

Figure 5: Historical Data and Projected 2020 and 2021 Base Toll Monthly Volumes

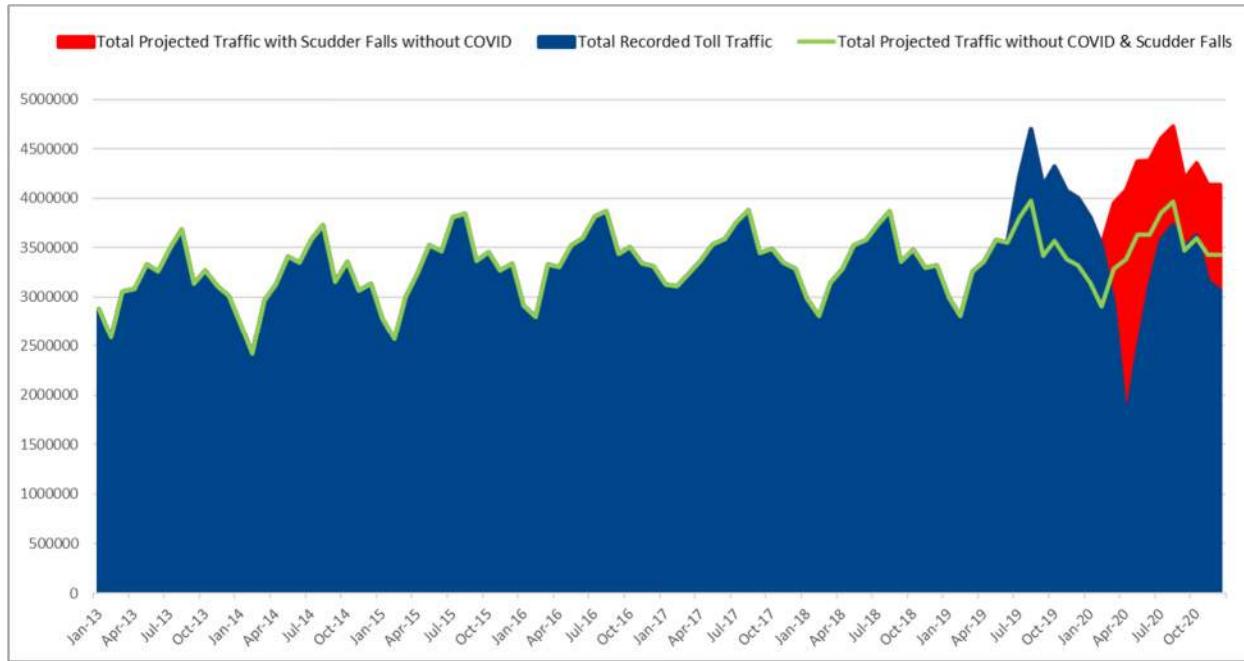

Upon consideration, targeted adjustments were not applied to the 2020 base toll data for construction projects, new development, or snow events. The snow events in 2020 were consistent with an average year and did not merit the application of any adjustment. There were construction projects and new development in 2020 that could have ultimately accounted for some increases or decreases in toll volumes, but considering the overwhelming impact caused by the Covid-19 Pandemic, the adjustments warranted by these conditions were considered to be minimal and not impact the preparation of the 2021 toll volume projections.

Since what Covid-19's impact on the population's behavior and associated traffic conditions will be in 2021 are still unpredictable (partial shutdown, recovery, normal), Covid-19 adjustment factors at for each state of shutdown (full or partial) were developed for each vehicle classification at each bridge. The March and April 2020 traffic volume data was not used because of the variable impacts of the early stages of the pandemic. Data from May and June were used to identify the impacts related to full shutdown, and the July through October data was used to develop impacts related to partial shutdown. The November and December numbers were not used to calculate partial shutdown rates because they showed a higher than average reduction in Toll volumes due to the reduced travel during the 2020 holiday season.

Figure 6 illustrates the estimated loss in toll traffic because of the Covid-19 Pandemic. The red area within Figure 6 represents the toll traffic lost as a result of the Covid-19 pandemic.

Figure 6: Effect of Covid-19 on 2020 Toll Volumes

Upon distribution of the Covid-19 vaccine to the public and reaching “Population immunity” it is anticipated that the Covid-19 impacts will lessen in a linear fashion until reaching what is being described as “new normal”. For the purposes of this report, population immunity is defined as the point at which 70-80% of NJ & PA residents are vaccinated, and it is anticipated that most state & local restrictions will be lifted.

The “new normal” will likely reflect continued temporary and permanent business closures along with longer-term remote work conditions that Covid-19 has produced. Research seems to suggest that anywhere from 0% to 20% of the current traffic volume changes due to Covid-19 could be permanent. This estimate is based off firm opinion surveys on the future of remote work.¹ It is anticipated that this “new normal” will be reflected in the passenger car volumes could be a permanent loss of anywhere from 0% to 4% of total passenger car toll volume. However, the data and projections of the “new normal” are based on surveys and actual company policies enacted following the Covid-19 pandemic may vary. Therefore, in developing the 2021 projected toll volumes, a “new normal’ with variable recoveries of lost passenger vehicle toll volume (100%, 90%, and 80%) were evaluated.

Projected gross toll revenues for the eight (8) toll bridges are calculated using the traffic volume forecasts and “average” toll rates for each of the bridges, which account for E-ZPass discounts for frequent passenger car travel and off-peak truck crossings. The weighted average toll rates were developed specific to each vehicle class on each toll bridge using total toll revenue collected and total recorded toll volumes during the latest full year of data (2020). The calculations do not reflect any toll increases for 2021.

¹ “What Jobs Are Being Done at Home During the Covid-19 Crisis? Evidence from Firm-Level Surveys.” National Bureau of Economic Research. https://www.nber.org/system/files/working_papers/w27422/w27422.pdf

2021 Base Toll Volume Forecast

Based on the historical traffic data, the 2021 Base toll volumes were developed for each vehicle class at each toll bridge. The overall projected background growth for the 2021 Base is approximately 2.6% which is reasonable compared to past years in which the growth ranges from approximately 0% to 4%.

Major construction projects and new development was identified to evaluate whether any adjustments would be made to account for related increases or decreases in toll volumes.

Major Developments

County planning/engineering offices for the eight (8) counties along the Delaware River within the study area (Bucks, Northampton, Monroe, and Pike counties in Pennsylvania and Mercer, Hunterdon, Sussex, and Warren counties in New Jersey) were contacted to request information regarding any large developments that could have a major effect on toll bridge volumes during the year 2021.

Northampton County identified one (1) large retail/commercial development anticipated to be completed in 2021, which resulted in projected increased volume on the I-78 and Easton-Phillipsburg Toll Bridges:

- Northampton Business Center consists of 6 warehousing/distribution high-cube buildings totaling 2,437,250 sq. ft. It is anticipated to generate approximately 568 toll trips per day and is anticipated to open in 2021.

Monroe County identified several large retail, commercial and residential developments anticipated to be completed in 2021, which could generate up to 990 toll trips per day on the Delaware Water Gap Toll Bridge:

- Green Valley Apartments is a proposed apartment complex expansion of 84 units in East Stroudsburg Borough.
- Mt. Nebo Apartments is a proposed apartment complex with 96 units in Middle Smithfield Twp.
- Tannersville Point Apartments is a proposed apartment complex with 80 units in Pocono Twp.
- Summit Health Campus is a proposed hospital campus consisting of 36,000 sq. feet of medical/office and 165,000 sq. feet of hospital area located in Tannersville.
- Smithfield Gateway Project is a proposed mixed-use development consisting of 236 residential units and over 200,000 sq. feet of commercial space located in East Stroudsburg.
- Virgin International Inc. is a proposed 130,434 sq. ft. warehouse/manufacturing structure located in East Stroudsburg.

As there is no specific information regarding the opening dates for any of the identified developments developments, no information regarding the potential impact of the ongoing Covid-19 pandemic, and the relatively small impact of the developments, a conservative approach was taken, and no adjustment factor was applied to the 2021 Base toll volumes for new development.

Roadway Construction Projects

Pennoni coordinated with the Commission and County planning/engineering offices to identify significant roadway construction projects near the bridges. In addition, the Pennsylvania Department of Transportation (PennDOT) Transportation Improvement Program (TIP) and New Jersey TIP were also reviewed. There are numerous projects scheduled for construction in 2021, however most are not

anticipated to impact traffic volumes at the bridges. Our findings for DRJTBC projects and major NJDOT and PennDOT projects are as follows:

- Multi-phased construction began in late 2010 on a new PA Turnpike (I-276) and I-95 Interchange in Bristol. The second contract of the construction of the I-95/I-276 Interchange connection, Section D20 will widen existing I-95 between Neshaminy Creek and existing I-276. The construction of the new southbound flyover structure to connect I-95 southbound and I-276 westbound was completed in 2018. Construction at the turnpike ramps on Route 13 in Bristol is still ongoing. Significant diversions as a result of the ongoing construction are not anticipated, and no adjustment has been applied to the 2021 Base traffic volumes.
- The Scudder Falls Bridge Replacement Project began in May 2017 and is scheduled to be completed in 2021. In past years, due to congestion issues and lane restrictions during construction, some traffic was anticipated to shift to other nearby Commission bridges, such as the Trenton-Morrisville Bridge, Lower Trenton Bridge, Calhoun Street Bridge, and Washington Crossing Bridge. Covid-19 has significantly reduced traffic on the Scudder Falls bridge, and thus reducing congestion related to the construction project. As there is no specific information regarding the impact of the ongoing Covid-19 pandemic on the diversion related to construction, a conservative approach was taken, and no adjustment factor was applied to the 2021 Base traffic volumes.

Base Toll Volumes are summarized in **Table 5**.

Table 5: 2021 Base Toll Volumes

Class	Trenton-Morrisville	Scudder Falls	New Hope-Lambertville	Interstate 78	Easton-Phillipsburg	Portland-Columbia	Delaware Water Gap (I-80)	Millford-Montague	Total
Passenger Car	9,429,216	8,139,582	1,793,251	8,711,411	5,126,506	1,244,861	8,222,475	1,226,539	43,893,841

2021 Toll Volume Forecasts

The projected 2021 toll volumes were developed by applying Covid-19 adjustments to each of the forecast 2021 base volumes, based on potential Covid-19 recovery timelines and varied levels of recovery from the effects of the pandemic.

The following are the 9 scenarios that were evaluated to develop the range of toll volumes, that could occur in 2021:

Scenarios 1-3 – Utilizes a short-term timeline in which a population immunity is reached in 6 months. Includes continued partial shutdowns until vaccine distribution to the general population in March 2021,

reaching population immunity and returning to “new normal” in August 2021, with recovery of lost toll trips due to Covid-19 being 100%, 90% and 80%, respectively.

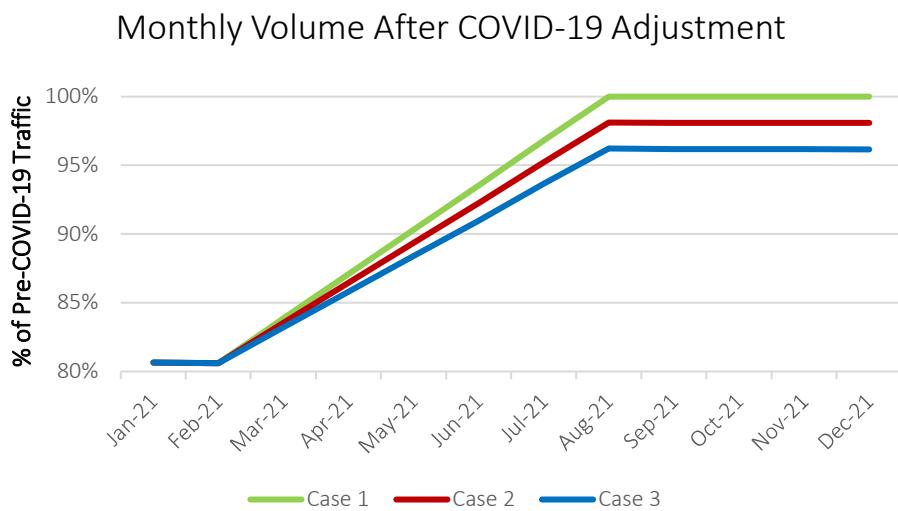

Scenarios 4-6 – Utilizes a medium-term timeline in which population immunity is reached in 11 months. Partial shutdowns continue until vaccine distribution to the general population in May 2021, reaching population immunity and returning to “new normal” normal in December 2021, with recovery of lost toll trips due to Covid-19 being 100%, 90% and 80%, respectively.

Scenarios 7-9 – Utilizes a long-term timeline in which population immunity is reached in 14 months. Partial shutdowns continue until vaccine distribution to the general population in June 2021, reaching population immunity and returning to a “new normal” in March 2022, with recovery of lost toll trips due to Covid-19 being 100%, 90% and 80%, respectively.

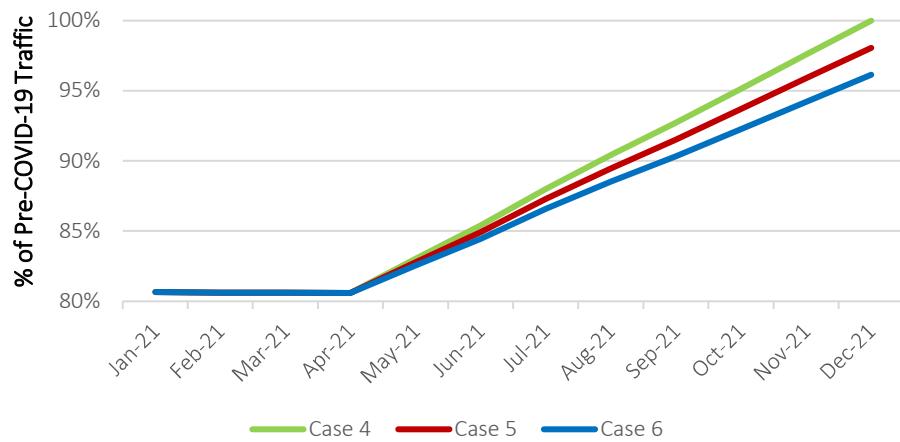

For the purposes of this report, population immunity is defined as the point at which 70-80% of NJ & PA residents are vaccinated, and it is anticipated that most state & local restrictions will be lifted.

Figure 6 illustrates the differences between the three evaluated timelines and the corresponding application of the monthly Covid-19 reductions for each.

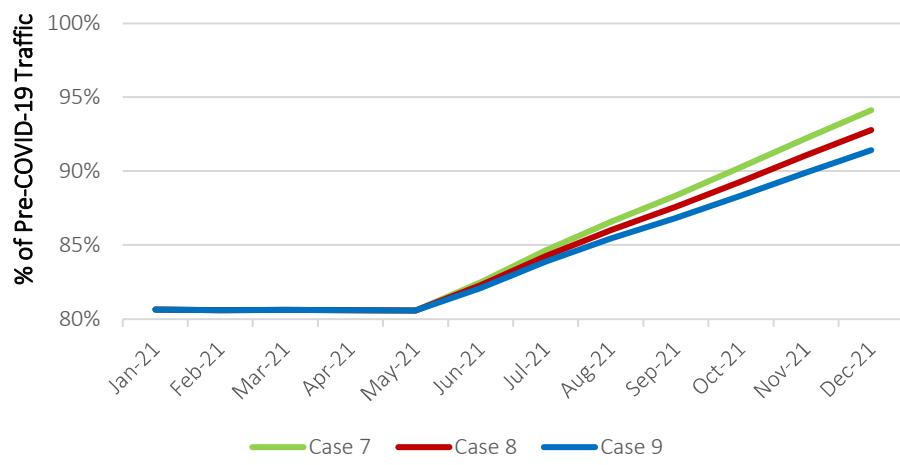

Figure 6: Comparison of Covid-19 Timelines

Monthly Volume After COVID-19 Adjustment

Monthly Volume After COVID-19 Adjustment

As previously mentioned, the “new normal” is intended to reflect the temporary and permanent business closures along with some level of the continued remote work structure and accessibility that Covid-19 has produced. In developing the 2021 projected toll volumes, the scenarios included “new normal’ conditions with of 100%, 90%, and 80% of the passenger toll volumes recovered.

Tables B-1 through B-8 in Appendix B summarize 2020 volume projections for each of the eight (8) toll bridges. The 2021 Traffic Volume Forecasts are summarized in **Table 6**.

Table 6: 2021 Toll Traffic Volume Forecasts

Bridge	Scenario 1	Scenario 2	Scenario 3	Scenario 4	Scenario 5	Scenario 6	Scenario 7	Scenario 8	Scenario 9
Trenton-Morrisville	9,448,522	9,296,489	9,144,455	8,843,853	8,753,234	8,662,615	8,504,673	8,448,497	8,392,322

Future Toll Revenue Projections

Using 2020 data, a weighted average toll rate for each vehicle class specific to each existing toll bridge was calculated using total toll revenue and total toll volumes. The 2021 projected toll revenue for each scenario was then calculated from forecasted toll revenue for 2021 and the calculated average 2020 toll rates at each bridge. The **Tables B-1 through B-8 in Appendix B** show the weighted average toll rates utilized for each vehicle type on the toll bridges and the calculated 2020 revenue projections. The 2021 Traffic Volume Forecasts for each Scenario are summarized in **Table 7**.

Total	\$150,365,572.98	\$150,108,895.25	\$149,852,217.54

Table 8 compares the 2020 toll volumes and revenues for each bridge with the range of projected 2021 toll volumes and revenues. As indicated, the overall toll traffic volumes are projected to increase by anywhere from 4,507,993 to 8,992,072 vehicles over 2020 depending on the scenario. Toll revenues are projected to increase by anywhere from \$9,560,936.55 to \$15,055,355.89.

Table 9 is provided in response to Section 501(a)(1) of the Commission's Bond Indenture and provides Total Revenue, Operating Expenses, Net Revenue, and Annual Debt Service for 20. The calculated Debt Service Coverage Ratio for 2020 was 1.64. The requirement that the Net Revenue for the preceding fiscal year be greater than 130% of the Annual Debt Service is met. However, the Commission's resolution to maintain a minimum Debt Service Coverage Ratio of 2.0 is not met and a debt coverage ratio less than 1.75 triggers an assessment of the need for a toll adjustment.

Table 10 lists the projected Toll Volumes, Toll Revenues, Net Revenues, and Debt Service Coverage Ratios for each of the 2021 Scenarios evaluated. Comparing the projected Net Revenues to the projected Annual Debt Service of \$49,224,225, the projected Net Revenue ranges from 157% to 168% of the Annual Debt Service (Debt Service Coverage Ratio of 1.57 to 1.68). The requirement that the Net Revenue for the preceding fiscal year be greater than 130% of the Annual Debt Service is met in all scenarios. However, the Commission's resolution to maintain a minimum Debt Service Coverage Ratio of 2.0 is not met in any of the scenarios and all scenarios trigger the assessment of the need for a toll adjustment. The individual Projected Revenue and Expenditures for each scenario evaluated can be found on **Tables C-1 through C-9** in Appendix C

Table 8: Volume and Revenue Comparison – 2020 to 2021

Bridge	2020 Actual Toll Volume	2020 Actual Revenue	2021 Projected Volume (Range)	2021 Projected Revenue (Range)	% Change in Toll Volume (Range)	% Change in Revenue (Range)
Trenton-Morrisville	7,395,024	\$17,380,282.59	8,392,322 - 9,448,522	\$18,896,693.05 - \$19,764,114.02	13.5% - 27.8%	8.7% - 13.7%

Table 9: Actual Revenue and Expenditures for 2020

Region	Bridge	2020 Volume	2020 Revenue
Southern	Trenton-Morrisville	7,395,024	\$ 17,380,282.59
Southern	Scudders Falls	5,329,000	\$ 12,707,708.83
Southern	New Hope-Lambertville	1,304,386	\$ 2,580,987.87
Central	Interstate 78	9,536,700	\$ 63,421,266.73
Central	Easton-Phillipsburg	4,265,095	\$ 7,814,390.28
Northern	Portland-Columbia	1,123,605	\$ 2,403,962.43
Northern	Delaware Water Gap	8,203,949	\$ 32,419,562.72
Northern	Milford-Montague	1,161,749	\$ 1,563,119.44
Total		38,319,508	\$ 140,291,280.89
2020 Toll Revenue		(From above)	\$ 140,291,280.89
Toll Violation Enforcement Revenue ¹			\$ 3,446,793.00
E-ZPass Service Fee Estimate			\$ 1,965,213.00
Interest Income			\$ 2,637,694.00
Other Income			\$ 327,565.00
1. Total Revenue - 2020			\$ 148,668,545.89
2. Operating Expenses - 2020			\$ <u>68,286,605.00</u>
3. Net Revenue		(Line 1 - Line 2)	\$ 80,381,940.89
4. Annual Debt Service			\$ 49,012,876.00
5. 130% of Annual Debt Service			\$ 63,716,738.80
6. Calculated Debt Service Coverage Ratio		(Line 3 / Line 4)	1.64
<p>Therefore, the requirement that the Net Revenue for the preceding fiscal year be greater than 130% of the Annual Debt Service is met, satisfying the requirements of the current Commission's Bond Indenture, Section 501(a)(1). The Commission's resolution to maintain a minimum Debt Service Coverage Ratio of 1.50 is also met.</p>			
<p>¹This represents violation administration fees charged offset by other allowances and adjustments including late fees, violation toll and administration fee dismissals/write-offs, reserves for outstanding violation balances and rejected transactions.</p>

Table C-1: Projected Revenue and Expenditures for 2021
Scenario 1

District	Bridge	2021 Volume	2021 Revenue
1	Trenton-Morrisville	9,448,522	\$ 19,764,114.02
1	Scudder Falls	7,458,981	\$ 16,112,759.11
1	New Hope-Lambertville	1,731,619	\$ 3,064,571.08
2	Interstate 78	11,480,340	\$ 67,981,810.66
2	Easton-Phillipsburg	5,147,728	\$ 9,022,601.09
3	Portland-Columbia	1,308,891	\$ 2,849,239.50
3	Delaware Water Gap	9,489,196	\$ 34,845,391.49
3	Milford-Montague	<u>1,246,303</u>	<u>\$ 1,706,129.83</u>
Total		47,311,580	\$ 155,346,616.78
Net Toll Revenue		(From above)	\$ 155,346,616.78
Toll Violation Enforcement Revenue ¹			\$ 776,733.08
E-ZPass Service Fee Estimate		(2021 Budgeted)	\$ 1,853,200.00
Interest Income		(2021 Budgeted)	\$ 1,500,000.00
Other Income		(2021 Budgeted)	<u>\$ 300,000.00</u>
1. Total Projected Revenue - 2021			\$ 159,776,549.86
2. Operating Expenses - 2021		(2021 Budgeted)	<u>\$ 77,127,891.00</u>
3. Net Revenue		(Line 1 - Line 2)	\$ 82,648,658.86
4. Annual Debt Service		(2021 Budgeted)	\$ 49,224,225.00
5. 130% of Annual Debt Service			\$ 63,991,492.50
6. Calculated Debt Service Coverage Ratio		(Line 3 / Line 4)	1.68
Therefore, the requirement that the Net Revenue for the preceding fiscal year be greater than 130% of the Annual Debt Service is met, satisfying the requirements of the current Commission's Bond Indenture, Section 501(a)(1). The Commission's resolution to maintain a minimum Debt Service Coverage Ratio of 2.0 is not met.			

¹This represents violation administration fees charged offset by other allowances and adjustments including violation toll and administration fee dismissals/write-offs, reserves for outstanding violation balances and rejected transactions

Table C-2: Projected Revenue and Expenditures for 2021

1	Trenton-Morrisville	8,662,615	\$ 19,102,726.80
1	Scudder Falls	6,344,507	\$ 14,415,004.53
1	New Hope-Lambertville	1,550,495	\$ 2,865,596.43
2	Interstate 78	10,870,640	\$ 67,288,462.37
2	Easton-Phillipsburg	4,880,546	\$ 8,710,975.73
3	Portland-Columbia	1,263,487	\$ 2,766,302.15
3	Delaware Water Gap	9,192,497	\$ 34,500,321.40
3	Milford-Montague	<u>1,224,063</u>	<u>\$ 1,681,285.79</u>
Total		43,988,850	\$ 151,330,675.20
Net Toll Revenue		(From above)	\$ 151,330,675.20
Toll Violation Enforcement Revenue ¹			\$ 756,653.38
E-ZPass Service Fee Estimate		(2021 Budgeted)	\$ 1,853,200.00
Interest Income		(2021 Budgeted)	\$ 1,500,000.00
Other Income		(2021 Budgeted)	<u>\$ 300,000.00</u>
1. Total Projected Revenue - 2021			\$ 155,740,528.58
2. Operating Expenses - 2021		(2021 Budgeted)	<u>\$ 77,127,891.00</u>
3. Net Revenue		(Line 1 - Line 2)	\$ 78,612,637.58
4. Annual Debt Service		(2021 Budgeted)	\$ 49,224,225.00
5. 130% of Annual Debt Service			\$ 63,991,492.50
6. Calculated Debt Service Coverage Ratio		(Line 3 / Line 4)	1.60
Therefore, the requirement that the Net Revenue for the preceding fiscal year be greater than 130% of the Annual Debt Service is met, satisfying the requirements of the current Commission's Bond Indenture, Section 501(a)(1). The Commission's resolution to maintain a minimum Debt Service Coverage Ratio of 2.0 is not met.			

¹This represents violation administration fees charged offset by other allowances and adjustments including violation toll and administration fee dismissals/write-offs, reserves for outstanding violation balances and rejected transactions
