Chairman DeGerolamo addressed the meeting and invited any comments from the public on items pertaining to today's Agenda.

EXECUTIVE DIRECTOR'S REPORT

Joseph Resta, Executive Director, addressed the meeting and said;

"Good Morning, Thank you, Mr. Chairman It's officially spring...or at least we think it is. Surprisingly, the winter of 2013-14 will not go down in the books as one of the worst on record apparently, by the usual standards of measure – snowfall totals and average temperatures – our region has had worse winters, but our own experience tell us otherwise. Considering there were multiple snow and ice storms,

DELAWARE RIVER JOINT TOLL BRIDGE COMMISSION

Meeting of March 31, 2014

some only days apart. There were no prolonged thawing periods in January or February, sheet ice occurred on the Delaware River into March. Ice jams in the Trenton area became so bad at one point in January that it caused flooding ice jams along both sides of the river. Meanwhile, the ice and snow accumulations from multiple storms covered the landscape in our jurisdiction for the better part of two months, and the brutal Polar Vortex winds of January and February will be remembered for a long, long time. The statistics may say otherwise, but the public's collective psyche places this winter easily among the worse in recent memory. This certainly was the case at the Commission, too. On 36 separate occasions this winter, we had to call in personnel to salt or plow road surface due to snow, freezing rain or refreezing events. The agency's response was a true team effort. Our districts kept on top of salt and fuel levels, enabling our purchasing department to succeed in restocking our supplies even when regional shortages arose. Maintenance crews responded in timely fashion to all 36 mobilization calls for storm or ice response – sometimes working double shifts. The ESS monitors at our Primary Control Center reported on ice jams and road conditions, coordinating the agency's response to snow and ice storms. Finally, our toll-collection personnel and bridge officers braved the elements to report to their posts in some extremely difficult conditions. Collectively, it was a job well done and I want to commend all of our essential personnel who kept the facilities open and traffic moving during this winter's wrath of snow, ice, wind and frigid cold.

Easton-Phillipsburg Toll Bridge Project, Coinciding with winter's recent retreat, construction activities resumed this month at our Easton-Phillipsburg Toll Bridge Rehabilitation Project. A two-tiered platform system has been installed over the bridge's eastbound lanes and will be extended over the westbound lanes later this week. Tarping of the bridge's Easton side is on track for completion in mid-April, when surface preparation and painting will begin on the massive steel truss. Meanwhile, the work zone for the project's 2014 construction stage has been established with corresponding single-lane travel restrictions along both directions of Route 22 are now in effect. While the travel configurations will change from time to time during 2014, uninterrupted single-lane restrictions are expected to remain in effect through the project area until mid-December. As we have done repeatedly on this project – starting well before work ever got underway – we are warning daily job commuters to expect congestion and delays when using the toll bridge during peak driving times. We are urging motorists to plan ahead and allow extra time to reach their destinations, or reschedule their commutes, or use the I-78 Toll Bridge as an alternate travel route whenever possible. The project's 2013 stage went very well once it got fully underway and we are hoping to repeat that experience in the months ahead in 2014.

We have some good news to report this month, a couple of projects the Commission conducted in 2013 recently received awards from engineering and construction organizations in New Jersey and Pennsylvania.

DELAWARE RIVER JOINT TOLL BRIDGE COMMISSION

Meeting of March 31, 2014

The project we conducted last summer and fall on the approach bridges, roadways, and access ramps here at the New Hope-Lambertville Toll Bridge has now amassed four awards- The Distinguished Engineering Award from New Jersey Alliance for Action. The Recycling Award for 2013, jointly given by Roads & Bridges magazine and the Asphalt Recycling and Reclaiming Association. A 2013 Honor Award from the New Jersey chapter of the American Council of Engineering Companies (ACEC). It also recently was announced that the project will receive an honorable mention from the national ACEC in late April. These awards were shared by the Commission and the engineering firm Cherry, Weber & Associates, which served as the project's design consultants. The awards highlighted the Commission's inaugural use of emulsified foamed asphalt technology for repaving work conducted as part of the project. As you may recall, the use of foamed asphalt enabled the Commission to reduce the paving costs for the project by roughly 30 percent.

Last year's rehabilitation project at the Lumberville-Raven Rock Toll-Supported Pedestrian Bridge also recently received an award. A Distinguished Award from the New Jersey chapter of the American Council of Engineering Companies. The Commission shared this award with STV, the engineering firm that provided construction management and construction inspection services for the bridge's rehabilitation. This project preserved a popular and extremely unique multi-catenary suspension footbridge that had been constructed in 1947 by the world-famous John A. Roebling's Sons Company. The Roebling Company is perhaps best known for constructing the Brooklyn Bridge. Like last year's project at our toll bridge here, we also have received notice that the Lumberville-Raven Rock rehabilitation will receive honorable mention from the national ACEC at a ceremony in late April. I hope I speak for everyone in commending our engineering department and our consultants for once again enabling the Commission's capital program to achieve additional awards.

Mr. Chairman, that concludes this month's report."

CONTRACTOR COMPLIANCE REPORT

MONTH OF FEBRUARY 2014

- During the month of February the Contract Compliance Department wrote drafts for a Construction Plan, a Professional Services Plan, a Task Order Agreement Plan and a Purchasing Plan. These drafts were shared with the Commission's attorneys to assist in adapting the documents to insert the legal component necessary to all plans of the Identified Business Enterprises.
- A meeting was held with Executive Director, Joseph Resta, Deputy Executive Director Arnold Conoline, and Commission attorneys to provide an update on how the CCP is developing and suggestions as to the scheduling of future activities for the department.
- The Contract Compliance Department met with Chief Engineer Roy Little and Assistant Chief Engineer Kevin Skeels to discuss procedural and coordination strategies of the Contract Compliance Department and the Engineering Department. This meeting was very productive and some of the issues that were brought to the table included increasing communication between the two departments pertaining to staff meetings notifications and policy changes, contract status notifications and construction options, such as opt-in and opt-out opportunities for professional services, as well as the coordination of task orders' close-out process.
- The CCD developed drafts of procedural forms and documents to be incorporated in the Contract Compliance Program for the contractors, subcontractors, consultants and any group or organization providing goods and services to the Commission.
- The CCD met with attorneys from Florio Perrucci Steinhardt & Fader and Stradley Ronon to review drafts of forms and plans developed by the CCD.
- The CCD staff and Commission attorneys are reviewing the final drafts guidelines for all plans, including "opt-in" "opt out" options and best and good faith efforts for prime consultants and sub-consultants.
- The CCD Director and Manager continue to participate in pre-proposal meetings as well as oral presentations for engineering Contracts.
- The CCD Director and Manager also continue to complete Contract Compliance reviews for TEC committees for Task Order Agreements.

TRENTON MORRISVILLE ADMINISTRATION BUILDING IMPROVEMENTS

SPACE PROGRAM AND CONCEPT STUDY Task Order Assignment No. C-598B-3

This Task Order Assignment is for a Space Program and Concept Study for the Trenton Morrisville Toll Bridge Administration Building. The purpose of this assignment is to provide the Commission with guidance in enhancing operational efficiency and facility space utilization. The Space Program will include a detailed analysis of the current versus required space to support the Commission's current as well as the projected operational, administrative and maintenance needs at the T-M facility.

At the conclusion of the Space Program, a Concept Study Report will be prepared by the Consultant presenting adjacency diagrams and sketches to explain space relationships and space allocation using the existing and/or new space. Three (3) proposed alternatives will be identified by the Consultant for review and consideration by the Commission in selecting the preferred alternative to be advanced to Final Design under a separate procurement process. Mechanical, Electrical, Plumbing, life and safety improvements will be part of each alternative. Use of a high-efficiency building management system will be evaluated.

A kick-off meeting was held with Gannet-Fleming on February 25, 2014. The Consultant is currently collecting as-built drawings, and reviewing building systems deficiencies and improvement recommendations as presented under various recently completed concept studies. Executive staff work session was held on March 14, 2014 and a Draft Space Program report is anticipated to be received by April 2014.

DMC ADVANCED ENGINEERING SERVICES FOR PRIORITY ITEMS OF WORK

Task Order Assignment No. C-502A-2D

Environmental Permitting - NJDEP issued the following permits in June 2013 for the SFB Project: *Flood Hazard Area Verification, Flood Hazard Area Individual Permit, Freshwater Wetlands Individual Permit, and Water Quality Certificate Approval*. These permit approvals are effective June 20, 2013 and expire June 19, 2018. The Delaware & Raritan Canal Commission (D&RCC) issued a Certificate of Approval for the project on July 15, 2013. A draft NJ riparian zone mitigation plan was submitted to NJDEP, in August, for review in accordance with the approved NJDEP Flood Hazard Area Individual Permit. Currently Engineering is reviewing the New Jersey wetlands and riparian zone mitigation options recommendation memo prepared by AECOM.

Pre-application meetings were held with the Bucks County Conservation District (BCCD) in 2013 to discuss details with the BCCD Permit and PA NPDES Permit applications. The BCCD and the PA NPDES Permit Applications were submitted to the BCCD in late January 2014, which were subsequently deemed complete for review by BCCD in February 2014. On February 27, 2014 a meeting was held with the USACE to review the USACE's wetland jurisdiction for the project. It was determined that the USACE will issue a preliminary Jurisdictional Determination for the Army Corps wetlands as part of the USACE Permit for the project; that a field meeting will be scheduled in the late March or early April time period to field inspect various wetland locations within the limits of the project in order to make a final determination as to the USACE's wetland jurisdiction for the project; and that any impacts to the USACE wetlands in NJ could be mitigated at the proposed Pennsylvania wetland mitigation site, if necessary.

The AECOM team continued to perform **Public Involvement** activities with the monitoring of the Project Hotline.

DELAWARE RIVER JOINT TOLL BRIDGE COMMISSION

Meeting of March 31, 2013 PROJECT STATUS REPORT
