EXECUTIVE DIRECTOR'S REPORT

Joseph Resta, Executive Director, addressed the meeting and said;

Good morning, commissioners, please let me start my remarks by briefly discussing a resolution for your consideration today, namely, the resolution concerning a partial reorganization of our operations departments. The last time that the Commission changed its organizational structure was late in 2017 for the 2018 budget year. At that time, the reasoning behind the change was moving from an operations group that was geographically organized to one that is organized under tasks such as maintenance, toll, and security.

Today's resolution considers a partial reorganization of operations to modify the task-based structure to include a merger of our toll operations to the patrol, incident response, and security

Meeting of March 27, 2023

portions of our operations. This step is a precursor to an eventual move away from in-person cash toll collection to an all-electronic toll collection environment in the coming years.

Strategic planning for that initiative is underway, but early indications are that the Commission would first undergo a "soft" conversion in the lanes, where the functionality of the "toll-by-plate" collection deployed at the Scudder Falls Toll Bridge is enabled at the Commission's seven other toll bridges. This process is expected to take years between the installation of the required technology and the ultimate demolition and removal of toll booths. Today's resolution is the first change to the structure of our operations to repurpose and retrain in-person cash toll personnel to other functions. This effort is ongoing and will be conducted in such a way as to minimize the personnel considerations to our employees, and the payment considerations of our travelling public.

The agenda also includes resolutions for legal services, retirements, promotions, and appointments of new employees. We ask you for your support on these as well.

Thank you, Commissioners, this concludes my remarks.

ELECTRONIC TOLL COLLECTION PROGRAM MONTH OF FEBRUARY 2023

The following items were recently initiated, accomplished or performed during the above noted month:

Activities for the In-Lane Toll System

- 1. TransCore replaced an overhead vehicle profiling unit (OPUS) at the Delaware Water Gap Toll Bridge Open Road Tolling (ORT) zone for the shoulder lane.
- 2. TransCore is coordinating the relocation of the bridge host and all cabling to the lane controllers for the Southern Operations and Maintenance Facilities Improvements project. They complete a site view to determine if the demarcation building was ready for them to begin their work. TransCore is preparing their materials and equipment to start this work.
- 3. The Commission executed a contract Unforeseen Allowance Reduction for costs associated with the installation, integration and testing (2 months) of a TransCore Encompass (E6) multiprotocol reader at the Trenton-Morrisville Toll Bridge. This reader will enable Commission toll facilities to read transponders that use TDM (IAG), SeGo or 6C protocols by the end of 2023, an IAG directive.
- 4. Commission Staff and TransCore meet monthly to review and discuss system operational and maintenance items. A weekly call also takes placed to briefly review system maintenance items for the week.

Activities for the E-ZPass Customer Service Center/Violation Processing Center

- 1. Commission staff and Conduent executed a contract change order to adjust the pay-by-plate process that allows for making toll adjustments for super-load vehicles when crossing the Scudder Falls Toll Bridge in the toll direction. These vehicles often have atypical configurations that do not allow for the correct vehicle classification, requiring intervention by Commission Staff to adjust the toll amount prior to the issuance of a toll-by-plate invoice. Work on this enhancement began with a kickoff meeting to confirm the requirements of the functionality.
- 2. Commission staff are working with Conduent to plan for the implementation of the IAG Interface Control Document (ICD) version 1.60. This will allow Customer Service Centers to receive data and process transactions from other transponder protocols such as SeGo and 6C. TransCore prepared revisions to the ICD between the toll host and the New Jersey E-ZPass Customer Service Center (CSC) that is required as the NJ CSC's prepared for IAG ICD 1.60. The revisions to the document were

completed and submitted to Conduent for their review. Conduent provided their review comments and Commission staff facilitated a meeting with both vendors to discuss the edits to this document, so it may be finalized. TransCore is currently finalizing the document.

3. The New Jersey Turnpike Authority (NJTA), as the lead agency, is facilitating all meetings with the other agencies and Conduent to manage the implementation of outstanding system elements for the New Jersey E-ZPass Customer Service Center. .

General Electronic Toll Collection Program Activities

- 1. Mr. Stracciolini participated in the IAG E-ZPass Executive Management Committee meeting and Policy Committee meetings. At the August 2021 IAG EMC Meeting, Mr. Stracciolini was elected by the members to serve as Vice Chair to the EMC.
- 2. Mr. Stracciolini is participating in the Non-toll Business Opportunity Task Force.
- 3. Mr. Stracciolini is serving on the International Bridge, Tunnel & Turnpike Association's (IBTTA) 2022 Emerging Technologies & Engineering and Construction Task Forces.

COMMUNICATIONS REPORT February 2023

• COMMISSION AWARENESS EFFORTS:

Lower Trenton Bridge Presentation – Researched and prepared a roughly 80-slide PowerPoint presentation for a breakfast meeting of the Rotary Club of Robbinsville-Hamilton in early March. This is a relatively short presentation considering that this bridge crossing has the longest history of the Delaware River crossings and a record six different superstructures.

Closed Out the Former Scudder Falls Bridge Replacement Project Website — Working with Erika Morgan of public involvement program subconsultant McCormick Taylor and Myron Mariano/Matt Touhey of Stokes Creative Group, the Scudder Falls project website was shut down approximately March 1. The web address, meanwhile, has been redirected to the Scudder Falls Bridge Replacement Project webpage on the Commission's public website, www.drjtbc.com. The project webpage also was completed updated and expanded as part of this transition process. A variety of relevant content was transferred in-house or by Myron Marian from the old project site to the webpage to complete the process. The project webpage will be maintained for no less than another year.

Rollout of 2024 New Hope-Lambertville Toll-Supported Bridge Rehabilitation and Design Contract Award — Crafted a two-page press release announcing the design contract award for a rehabilitation project scheduled to take place at the New Hope-Lambertville Toll-Supported Bridge in 2024. Also drafted a communication edited and distributed by Community Affairs Director Jodee Inscho that is intended to provide additional information to elected officials serving the two communities. Both products were reviewed by the engineering department before issuance. A third product — a project-specific webpage — also was worked on as part of the rollout but is not expected to be completed and posted until mid-March.

Online New Hope-Lambertville Toll-Supported Bridge Historical Account – Due to other matters that arose in February, the completion of a thorough online history of the New Hope-Lambertville Bridge is now expected to go live in March. The timing will coincide with the creation of a webpage for the upcoming New Hope-Lambertville Toll-Supported Bridge Rehabilitation Project, slated for execution in 2024. Made additional edits and additions to this product during February.

TRENTON-MORRISVILLE TOLL BRIDGE

SOUTHERN OPERATIONS & MAINTENANCE FACILITIES IMPROVEMENTS

Preliminary, Final & Post Design Services Contract No. C-519A (RJZ/KMS)

This contract is for Preliminary, Final and Post-Design Services for space utilization improvements at New Hope Lambertville Toll Bridge Executive Headquarters and the demolition and reconstruction of the Trenton Morrisville Toll Bridge Administration Building as identified under a Task Order Assignment for Space Utilization Program and Concept Study.

In accordance with the Commission's February 26, 2018, Regular Monthly Commission Meeting, this Contract was awarded to Gannett Fleming, Architects Inc. (GF). Accordingly, a Notice of Award and Limited Notice to Proceed was issued to GF effective February 27, 2018.

A Kick-Off Meeting was conducted with GF on March 20, 2018. GF is currently coordinating with all public utilities, completed the Boundary & Topographic surveys, Space Utilization Program to address the Commission's current operations and anticipated needs in the foreseeable future as well as Final Design. A Concept Design and preliminary Phasing options were submitted and presented to the Commission on 10/28/19 with an advance Contract T-730A that covers Trenton Morrisville's salt and fueling operation's needs. The purpose of this advance Contract T-730A was to complete the new salt operation at this location and have it fully operational for the winter of 2020-2021. This was being planned to take place prior to the demolition of the existing building together with the current salt operation. The second Contract T-519A was publicly bid on April 12, 2021, to cover the construction of the balance of the Southern Operations & Maintenance needs in a multi-phased construction.

An NPDES permit Pre-Application meeting was held with Bucks County Soil Conservation on September 26, 2019, in connection with the Southern Operations Facility intended to be built at Morrisville, NPDES and Erosion & Sediment Control permits were submitted on December 4, 2019, and both approvals were obtained on March 18, 2020. In addition, building systems phasing coordination meetings were conducted on 11/25/19, 12/6/19 and 12/18/19. Electronic Bids for Contract T-730A were received on March 5, 2020, Construction Contract award was made to the apparent Low Bidder's, Bracy Construction, Inc. at the April 27th Regular Monthly Meeting, Construction was substantially completed on November 6, 2020, and Project was completed on November 20, 2020, on schedule under budget. GF provided Post Design services through-out construction of this Project.

March 27, 2023 PROJECT STATUS REPORT

In connection with Resolution No. 4076-12-18 and the new real estate property acquisition at Langhorne to house the Commission's Southern Maintenance Facility; GF completed the Boundary and Topographic Land Surveys necessary for Lot Consolidation in Bucks County, Environmental Assessment Phase I and Phase II.

A second advanced Final Design submission was made by GF on 12/2/19 for the Langhorne Site to implement the environmental remediation as listed in the Phase II report, demolition of ten (10) existing buildings and secure the site with perimeter fencing. Using one of the Commission's standing Job Order Contractor RCC Builders Contract TTS-737A-2 was executed January 22, 2020. GF provided Post Design services through-out construction and this Project was closed June 15, 2020.

As part of an NPDES permit application process for this site, screening for suspected Bog Turtles and other federally endangered species was made on June 14th, 2019, by the US Army Corp. of Engineers (ACOE) and found that the Project site does not include a Bog Turtle Habitat. In light of these results an environmental permitting pre-application meeting were held on June 20th, 2019, and January 23, 2020 with PADEP in attendance together with the US Army Corps of Engineers as relates to a joint permit for wetland and storm water impact and mitigation at this Langhorne site. Also, as a pre-requisite to obtain NPDES permit approval, a SHPO survey was made and a determination that there are no historic properties exist on site was obtained on March 24, 2020. In addition, ACOE conducted a survey on March 16th, 2020, and determined that none of their jurisdictional waters or wetlands exist on this site. Furthermore, the ACOE biologist who provided this survey agreed that the pond that exists on-site is man-made and therefore is not considered jurisdictional based on his field inspection. Additionally, two state identified endangered species were identified by the Pennsylvania Natural Diversity Inventory (PNDI) to potentially exist on-site. The Consultant initiated field surveys on March 13th, 2020, and field traps were placed to determine if their habitat exists within the project limits to develop a mitigation plan. Survey concluded and PNDI concurred on September 9th, 2020 that none exists within the Commission's property.

A request for site Access Easement to Big Oak Road through PECO's neighboring property was made on November 1st, 2019, conditional approval was received, and an easement agreement has been received from PECO. GF prepared the Legal Description and Plot Plan, and Commission's Real Estate Counsels filed this easement with the County's Clerk's Office.

A General Permit GP-7 for minor wetland crossing was submitted on November 4, 2020, and an approval was received from PA DEP on December 22, 2020.

A Bucks County Soil Erosion and Sediment Control (SE&SC) Permit was submitted together with an NPDES Permit on August 24, 2020, and an SE&SC permit approval was received April 23, 2021. NPDES conditional approval was received on September 27, 2021 pending PADEP approval of ACT 537 Sewage Planning Module which was received November 15, 2021 to address the local sewage disposal capacity that will be exceeded due to this Project.

Constructability, Peer, and Code review meetings were conducted on February 18, February 19 and February 24, 2021. Final Design submission and Bid Documents were received

March 27, 2023 PROJECT STATUS REPORT

on April 9, 2021. Project public bid advertisement was made on April 12, 2021, virtual Pre-Bid meeting and site visits were made on April 19 and April 29, 2021, and electronic Bid Opening was made on June 2, 2021. Three bids were received, reviewed and a Construction Contract Award was made at the June 2021 Regular Monthly Meeting.

Currently GF is providing Post-Design services for Contract T-519A by attending all Project meetings, responding to requests for information, reviewing submittals, assisting in resolving conflicts in the field and clarifying the contract documents.

As part of the CM services the Consultant scope of work includes Constructability Review of the Bid Documents during the Pre-Construction phase of T-519A.

ELECTRONIC TOLL COLLECTION

Customer Service Center/Violation Processing Center Project Contract No. DB-584A (CAS/KMS)

Commission staff and Conduent executed a contract change order to adjust the pay-by-plate process that allows for making toll adjustments for super-load vehicles when crossing the Scudder Falls Toll Bridge in the toll direction. These vehicles often have atypical configurations that do not allow for the correct vehicle classification, requiring intervention by Commission Staff to adjust the toll amount prior to the issuance of a toll-by-plate invoice. Work on this enhancement began with a kickoff meeting to confirm the requirements of the functionality.

Commission staff are working with Conduent to plan for the implementation of the IAG Interface Control Document (ICD) version 1.60. This will allow Customer Service Centers to receive data and process transactions from other transponder protocols such as SeGo and 6C. TransCore prepared revisions to the ICD between the toll host and the New Jersey E-ZPass Customer Service Center (CSC) that is required as the NJ CSC's prepared for IAG ICD 1.60. The revisions to the document were completed and submitted to Conduent for their review. Conduent provided their review comments and Commission staff facilitated a meeting with both vendors to discuss the edits to this document, so it may be finalized. TransCore is currently finalizing the document.

The New Jersey Turnpike Authority (NJTA), as the lead agency, is facilitating all meetings with the other agencies and Conduent to manage the implementation of outstanding system elements for the New Jersey E-ZPass Customer Service Center.

The Commission executed a contract Unforeseen Allowance Reduction for costs associated with the installation, integration and testing (2 months) of a TransCore Encompass (E6) multiprotocol reader at the Trenton-Morrisville Toll Bridge. This reader will enable Commission toll facilities to read transponders that use TDM (IAG), SeGo or 6C protocols by the end of 2023, an IAG directive.

Commission Staff and TransCore meet monthly to review and discuss system operational and maintenance items. A weekly call also takes placed to briefly review system maintenance items for the week.
