7. **EVALUATION CRITERIA:**

The Delaware River Joint Toll Bridge Commission has the obligation to safeguard itself from poor-quality service, work and/or materials provided by any and all vendors. Therefore, The Delaware River Joint Toll Bridge Commission will conduct a best value determination by conducting a tradeoff between the following evaluation factors: Price, Capability, and Past Performance. For evaluation purposes, Capability is more important than Past Performance, which is more important than Price. Bidders may submit the names and phone numbers of up to three (3) prior customers whom The Delaware River Joint Toll Bridge Commission may contact at its sole discretion.

REQUEST FOR PROPOSAL (RFP) 4 Vehicles – 2 Maintenance Trucks, 2 Patrol SUVs

The absence of relevant Past Performance will be viewed neutrally, not negatively. The Delaware River Joint Toll Bridge Commission will assess Capability and Past Performance as Superior, Acceptable, Neutral, or Negative.

Therefore, award of contracts to bidders may not be made to the bidder with the lowest price. The Delaware River Joint Toll Bridge Commission reserves the right to make multiple awards for any site, or no award at all at its sole discretion. The Delaware River Joint Toll Bridge Commission may award contracts based on initial quotes or may enter negotiations or discussions with potential awardees at its sole discretion.

8. **PURCHASE ORDER:**

After quotes are received and evaluated the pending Proposer will be asked to submit for approval their documentation of Insurance Requirements. Upon approval of the Insurance Requirements the RFP Issuing Office shall execute and issue a Purchase Order to the Proposer that best meets the evaluation criteria in response to the RFP. Suppliers may not proceed to provide services until receipt of a Fully Executed Purchase Order from the RFP Issuing Office. Each RFP and Purchase Order will be deemed to incorporate the terms and conditions set forth in this RFP.

9. **PAYMENT:**

Payment will only be made, to the Proposing Vendor, in one final installment upon vehicle delivery and approval. Subsequently, the Upfitting Vendor(s) will receive payment from the Proposing Vendor.

10. It is imperative that the Proposing Vendor is responsible for organizing all transportation related to the upfitting process, as well as ensuring that the quality of work meets the highest standards of the Delaware River Joint Toll Bridge Commission (DRJTBC).

(a) The DRJTBC holds the right to reject vehicle delivery if the quality of parts and/or installation does not align with the provided specifications or meet our satisfaction.

11. **VEHICLE WARRANTY:**

All vehicles must have a minimum of the following warranty:

- (a) Basic warranty - 36 months/36,000 miles
- (b) Powertrain warranty - 60 months/60,000 miles
- (c) Corrosion perforation warranty - 60 months/unlimited
- (d) Roadside Assistance Warranty - 60 months/60,000 miles

12. **UPFITTING WARRANTY:**

- (a) All parts and components used in the upfitting process must be subject to the manufacturers' warranty. This ensures quality and reliability in our operations.
- (b) The installation of these parts must be warrantied for a minimum of one year. It is crucial that we have this assurance to safeguard against any unforeseen issues.
- (c) In the event of any problems or defects, all warranty claims will be handled directly by the upfitting vendor. Clear communication channels must be established for swift resolution.
- (d) As part of the proposal submission, proof of all warranties associated with the upfitting services provided must be included. This documentation is essential for accountability and transparency.

These requirements are non-negotiable and must be met without exception. Your attention to this matter is greatly appreciated to ensure a successful partnership moving forward.
